

HI3887  
Quick-Check  
Swimming Pool  
Test Kit

Free Chlorine and pH

Swimming pool water requires daily tests for chlorine and pH. Hanna's Quick-check test kits combine these two basic parameters in swimming pool monitoring.

Chlorine is commonly used in swimming pool water for its disinfectant properties.

pH should be monitored to ensure proper activity of the disinfecting agents.

This kit is ideal for performing routine pH and chlorine testing.

Chlorine and pH tests are colorimetric (color comparison).
