

MATCHEM®

CARBON CLEANER

USES :

Matchem Carbon Cleaner is a heavy duty cleaner, degreaser and carbon remover for use in cleaning carbon deposits on boiler fire side, heat exchange, compressor blades, diesel engine parts, automotive, marine engines and other machinery.

BENEFITS :

- Effective cleaner for cleaning any parts of fuel oil heaters, heat exchanger, automobile, marine and diesel engines, oven and other machinery.
- Non alkaline cleaner, will not attack metal.

SPECIFICATION :

- Physical Form : brownish liquid
- Density at 30 °C : 0,85 – 1,00

DOSAGE & FEEDING

Dosage of **Matchem Carbon Cleaner** will vary depending upon thickness of carbon deposits.

Immersion of circulation Method. For cleaning heavy deposits, first remove the heavy accumulation of deposits from engines parts, after removing rubber components, in **Matchem Carbon Cleaner**, or circulate until all deposits become soft and dissolved.

Spray or Brush Method. Apply by spray or brush on carbon deposits, let soak for 30 to 60 minutes, rinse in water and repeat if necessary.

HANDLING :

Matchem Carbon Cleaner may cause allergic skin irritation in susceptible individuals. The product may be harmful if inhaled, and may be fatal if swallowed or absorbed through the skin. Wear rubber gloves, an impervious rubber apron, and goggles or a face shield when handling **Matchem Carbon Cleaner**. In case of eye or skin contact immediately flush eyes or skin with water for at least 15 minutes and get medical attention. Keep drums in a cool and dry place. Minimize exposure to air.

PACKAGING :

30 liter in pails.
