

Water Treatment and Industrial Applications

PRODUCTS OVERVIEW

supplierfilterair.com

seko is an International Group, developing, manufacturing and delivering its products in more than 50 countries, through its 18 subsidiaries and an extended network of distributors, agents and authorized dealers.

seko is a leading manufacturer of dosing pumps and dosing systems with more than 40 years experience.

This long activity allowed seko to acquire a wide experience in several different applications and to confirm its international success in many industrial fields through the supply of reliable solutions for the dosing, injection and transfer of liquids.

Water treatment & Industrial applications

Dosing systems for the water treatment includes solenoid metering pumps, motor driven mechanical pumps, measure and control instruments and a wide range of accessories.

Our long experience has led us to develop specific products for the different applications on the various markets of which both seko and its customers have been leaders for years.

Dosing systems for swimming pools, pumps and integrated measuring instruments and pre-assembled panels for measuring and monitoring the chemical and physical properties of water are simply a few examples of the development of products based on the specific needs of the market and of customers.

The design of metering units with tanks, stirrers, metering pumps and their accessories, together with systems for the automatic polyelectrolite preparation complete the range of products based increasingly on an approach oriented on Customers needs

Motor Driven Metering Pumps

The range of our motor driven pumps features a high level of reliability and accuracy. Tough and plain, they guarantee excellent quality in time

Plunger piston and mechanical diaphragm metering pumps Spring Series

Three sizes of mechanism and a wide selection of models with different performances allow the user to find the appropriate solution for almost any application.

- n Capacity range : up to 1000 L/h, up to 20 bar
- n Liquid end : AISI 316L, PVC and PP

Plunger and Double Diaphragm pumps Nexa Series

Plunger and Double Diaphragm pumps with fully engaged mechanism for heavy duty. The experience cumulated with SEKO Exacta series pumps in the heavy duty applications has been utilized for the industrialized design of this series. High flexibility in the pump configuration and easy maintenance allow to customize the pump also after the installation.

- n Capacity range : up to 2779 L/h, up to 200 bar
- n Liquid end : AISI 316L, PP, PVDF and PVC
- n API 675 Standards " ATEX marking

Automatic polyelectrolyte preparation system continuous-flow in stainless steel and polypropylene Polycendos

The preparer is a device designed for automatic continuous flow preparation of a polyelectrolyte solution, starting from the polyelectrolyte in powder form and water.

- n Flow capacity : from 550 to 3.000 L/h
- n Volume : from 700 to 3400 lts.

Industrial Mixers

Seko, provides a wide range of mixers for any application in water treatment and industrial processes, helping the customer specific design of the same, for example mixing chamber, settling, etc...

- n Mixing capacity : up to 500.000 liters
- n Rotation speed : from 30 to 3000 rpm
- n Connection flange size : DIN2576; DN125; DN80; DN50; PN10
