# BEHN MEYER Performance Chemicals

#### WATER TREATMENT

# **bmSOLUTION RL 811**

# Antiscalant for Reverse Osmosis System

- High performance RO membrane antiscalant
- Suitable for use in seawater desalination process application
- Highly effective calcium carbonate scale control
- Additional control of calcium sulphateand other metal oxides scale

# **Technical Data Sheet**

Rev. No. 01/2014/811

#### **DESCRIPTION**

**bmSolution** RL 811 is an ultraphosphate based antiscalant for Reverse Osmosis and Desalination system. It is effective to disperse scale component such as Calcium Sulphate, Calcium Carbonate, and other scale materials and keep RO membrane surface clean enabling a RO unit to operate at maximum efficiency and prolong service life of RO membrane. It is effective at low dosage and the product is stable as prepared solution.

#### **PROPERTIES**

Appearance : Colorless to yellowish liquid

pH (neat) : 7.0 ± 1.0

## **APPLICATION**

bmSolution RL 811 Antiscalant is recommended to be pre diluted to 5% solution with feed or product water of RO system and is fed continuously into the RO feed water line with metering pump. Periodical cleaning of RO membrane by using bmSolution RL 821 chemical cleaning agent is strongly recommended for optimum RO unit operation.

#### **DOSAGE**

General dosage is in the range of 10 to 20 mg/l. However, will vary depending on RO feed water quality. Your Behn Meyer representative will provide you with proper control requirements for your specific application.

## **WATER TREATMENT**

#### **STORAGE**

**bmSolution RL 811** Antiscalant should be stored under cool and dry conditions in a well-ventilated area. Direct exposure to sunlight should be avoided.

#### **HANDLING**

For detailed information on toxicological properties and handling precautions please refer to the current Material Safety Data Sheet. The MSDS can be obtained from your local Behn Meyer representative directly.

#### **PACKAGING**

bmSolution RL 811 Antiscalant is packed in 30 kg carbo
