

(BS-2115)

BACTERIA STARTER FOR WASTEWATER TREATMENT PLANT

DESCRIPTION

BS-2115 is a specialized bacteria starter composition to accelerate bacterial growth in aerobic process. This particular composition consists of various bacteria such as lactobacillus, Lactococcus and several other rejuvenating bacteria.

ADVANTAGES

- Ideal composition for aerobic process.
- Accelerate start up process.
- Amino acid resource.
- Accelerate aerobic recovery system.
- Perpetrate degradation process of COD and BOD.

ATTRIBUTES

Appearance : Yellow Brown Liquid
pH : 5 - 7

DOSAGE

Normal dosage approx. 10-15 ppm from BOD Load Inlet

HANDLING AND SAFETY

BS-2115 can cause severe damage to eyes and skin. Avoid contact with eyes and skin to prevent serious injury. Please refer to detailed information about product's hazard data sheet. Immediately, seek for medical advice to treat serious injuries caused by inappropriate handling with this product.

EXPIRY AND PACKAGING

This product can last for a year after the seal is opened. The product is packaged in 30 Kg pail.
