

HUSKY 100

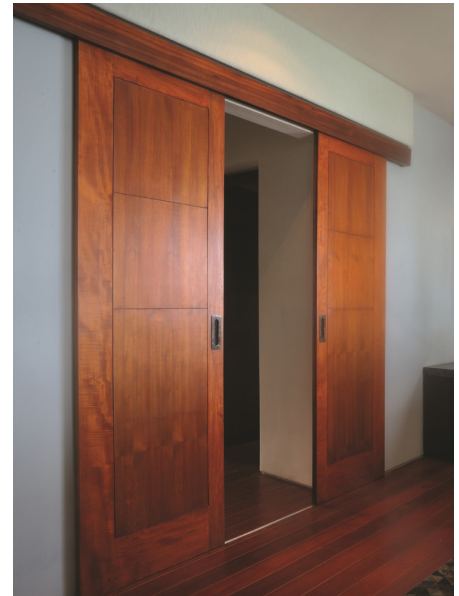

HENDERSON

100kg Wood Metal Interior

Sliding door hardware for wooden doors up to 100kg

Overview

Versatile and silent, the Husky sliding door hardware system is ideal for creating wardrobe doors and room dividers with one or more wooden, wooden framed, composite or metal doors at each side. The Husky 100 supports doors of up to 100kg. A fittings kit is available to be purchased which allows an additional door to be fitted to the track.

Features and Benefits

- Available with a choice of galvanised steel or aluminium track, complemented with nylon rollers to ensure a smooth, quiet operation
- Reliable and highly versatile sliding door hardware utilising precision made components for a trouble free operation
- Suitable for both wooden and metal framed doors
- Metal doors should be lightly constructed or channel or angle framing, clad with sheeting as required
- The opening can be covered by one or a number of doors sliding to either side. When the door travels more than its own width, a continuous bottom guide channel must be used with two guides per doors
- Flexible fixing options. The track may be soffit fixed direct to the underside of the lintel (single or multiple runs) or face fixed with brackets

Product and Door Specification

Kit Short Code (Steel Track)	Kit Short Code (Aluminium Track)	Door Material	Track Length	Door Thickness Range	Max. Door Width	Max. Door Height	Max. Door Weight
