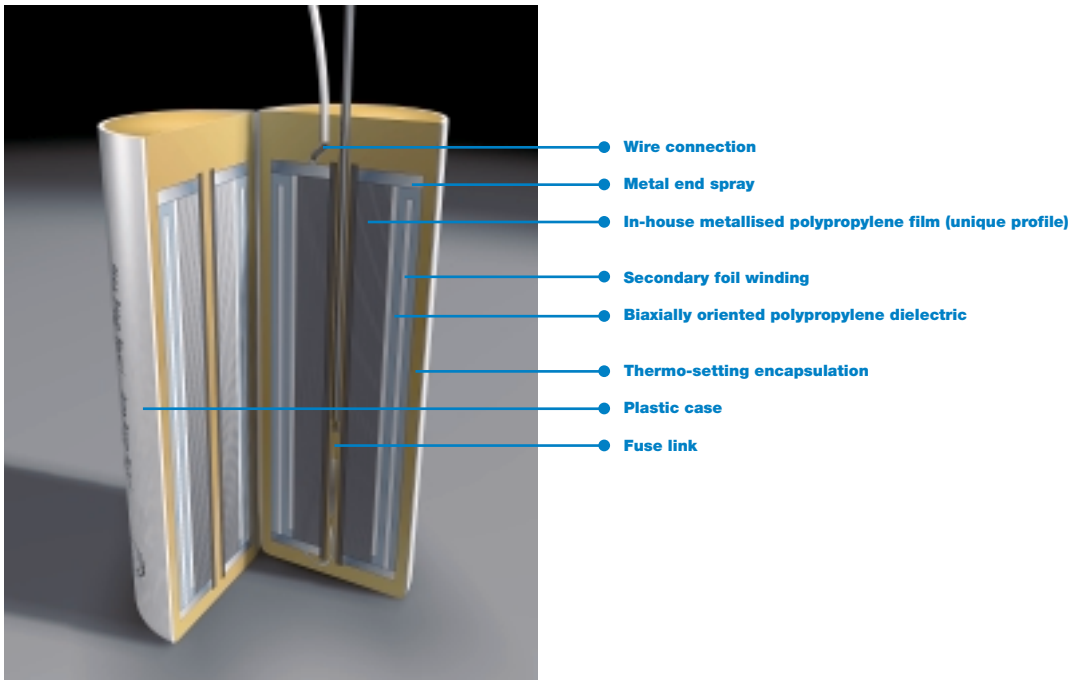
LV Capacitor CLMD

Reliability for Power Factor Correction

CLMD: reliability for power factor correction

CLMD construction

- The CLMD capacitor consists of a number of wound elements made with a dielectric of metallized polypropylene film. These dry windings are provided with a sequential disconnector ensuring that each element can be reliably and selectively disconnected from the circuit at the end of its life.
- The capacitor elements receive a treatment under vacuum in order to ensure perfect electrical characteristics. Each winding is placed in a plastic case and encapsulated in thermo-setting resine in order to obtain a perfectly sealed element.
- The elements are placed inside a sheet steel box and connected in such a way as to supply the single or three-phase power at the required voltage and frequency.
- The sheet steel box is filled with inorganic, inert and fire proof granules in order to absorb the energy produced or to extinguish any flames in case of a possible defect at the end of an element's life. The CLMD is also provided with thermal equalizers to ensure effective heat dissipation.



High performance in-house metallised film

ABB's completely integrated manufacturing process has resulted in the development of the special ABB high-performance film of which all ABB L.V. capacitors benefit:

- high breakdown strength
- excellent peak current handling capability
- high capacitance stability
- optimal self healing design
- long life

Reliable and safe

Dry type design
The CLMD has a dry type dielectric and therefore cannot give any risk of leakage or pollution of the environment.

Very low losses
Dielectric losses are less than 0.2 Watt per kvar. Total losses, including discharge resistors, are less than 0.5 Watt per kvar.

Long life - Self-healing
In the event of a fault developing in the dielectric of the capacitor, the metallized electrode adjacent to the fault is immediately vaporized, thus insulating the fault. The capacitor then continues normal operation.

Fire protection
All capacitor elements within the CLMD capacitor are surrounded by vermiculite which is an inorganic, inert, fire proof and non toxic granular material. In the event of any failure the vermiculite absorbs safely the energy produced within the capacitor box and extinguishes any possible flames.

Unique protection system
A unique Sequential Protection System ensures that each individual element can be disconnected from the circuit at the end of its life.

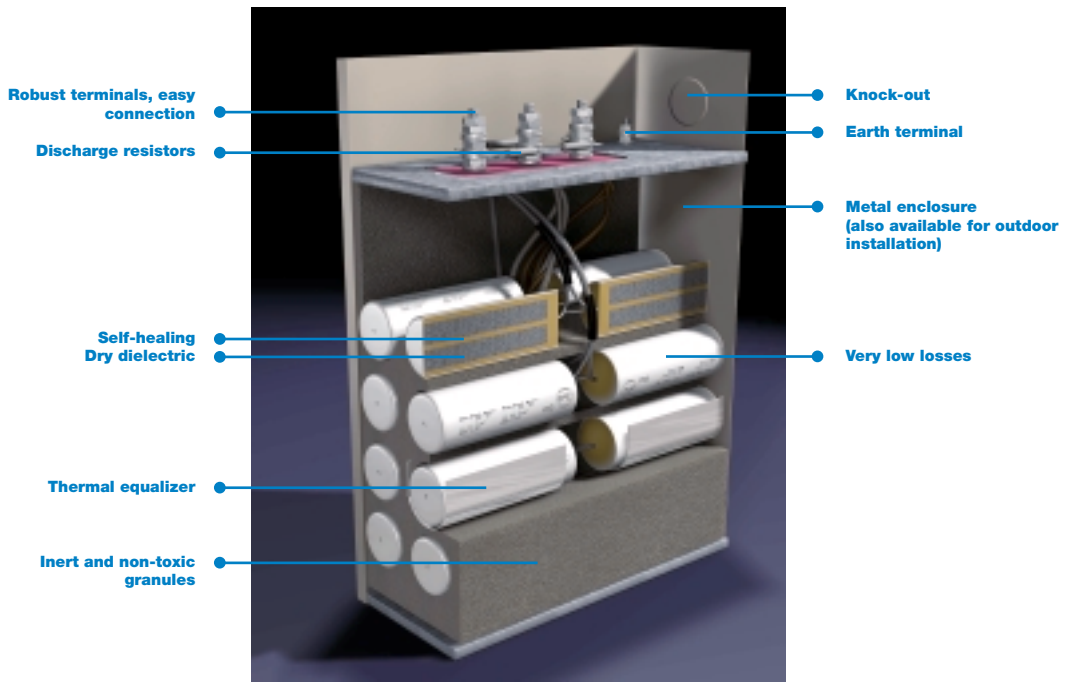
Easy to install - Light weight
The CLMD capacitor is very lightweight and therefore presents no handling difficulties during installation.

High reliability
The CLMD capacitor complies with the requirements of IEC 831-1 & 2. The use of robust terminals removes the risk of damage during installation and reduces maintenance requirements.

Security
Thermal equalizers are fitted to surround each capacitor element and provide effective heat dissipation. The CLMD capacitor is equipped with discharge resistors.

ISO 9001
Our ISO 9001 Quality System registration provides the strongest assurance of our product quality.

ISO 14001
The CLMD capacitor has a dry type dielectric and is free from liquids or other impregnating agents. It has been designed for environmentally friendly manufacturing. Our ISO 14001 certification guarantees our commitment to the environment.



A comprehensive range - CLMD 43, 53, 63 & 83

The CLMD capacitor unit is designed in such a way to give the highest level of reliability, safety, performance and power all in a robust and compact fashion.

Modular - CLMD 13

The CLMD 13 is designed to make an easy parallel connection of capacitor units.
The CLMD 13 is the ideal basic unit for a modular system.

Compact - CLMD 33

The CLMD 33 is intended for use in capacitor banks. It offers high power density and small dimensions. Discharge resistors are not included.

Technical specifications

Voltage range	From 220 to 1000 V.
Frequency	50 and 60 Hz.
Connection	3-phase as standard construction (single-phase on request).
Discharge resistors	Permanently connected built-in discharge resistors are sized to ensure safe discharge of the capacitor to less than 50V in 1 minute after a switch off. Discharge resistors are not included for CLMD33.
Terminals	- CLMD13 : three M6 terminals. - CLMD33 : three cable outputs. - CLMD43-53-63-83 : with threaded rods M6, 8, 10 or 12 according to the power of the capacitor.
Earth	CLMD13-33 : earth connection on the enclosure fixation. CLMD43-53-63-83 : a M8 terminal is included under the cover.
Cable input	By a knock out : CLMD13 : 22.5 mm. CLMD33-43-53 : 37 mm. CLMD63-83 : 47 mm.
Case material	Zinc electroplated mild steel.
Colour	Beige RAL 7032.
Fixing	- CLMD13 : with two slots, diameter 6.5 mm (suitable fixing for assembly in module). - CLMD33 : with eight fixation holes, diameter 5.4 mm. - CLMD43-53-63-83 : with two slots 26 X 12 mm.
Execution	Indoor (outdoor on request).
Protection	IP 42 (IP 54 on request).
Maximum ambient temperature	Class "D" (+55°C) according to IEC 831.
Minimum ambient temperature	- Indoor type: -25°C. - Outdoor type: -40°C.
Minimum distance between units	- CLMD13-33 : 20 mm. - CLMD43-53-63-83 : 50 mm.
Minimum distance between units and wall	- CLMD13-33 : 20 mm. - CLMD43-53-63-83 : 50 mm.
Losses (discharge resistors included)	< 0.5 Watt/kvar for 380 V rated voltage and above.
Tolerance on capacitance	0 % + 10 %.
Voltage test	- Between terminals: 2.15 Un for 10 seconds. - Between terminals and earth: 3 kV for 10 seconds.
The acceptable overloads are those specified in IEC 831-1&2	- Overvoltage tolerance: 10% max. at intervals. - Overcurrent tolerance: 30% permanently. - Maximum overload: stable operation at 135% of the nominal rating (generated by overvoltages and harmonics).

Important: the installation of capacitors on networks disturbed by harmonics may require special precautions, especially when there is a risk of resonance.

Dimensions

CLMD 43 - 53 - 63 - 83
