

Junction box

Description

Junction box

The connection boxes adopt high quality stainless steel covers and durability, and excellent sealing performance. There are two series: one with function of signal adjustment and another with function of excitation voltage adjustment, matched with specifications of twelve-wire, ten-wire, eight-wire, six-wire, four-wire. We specially recommend connection boxes with function of excitation voltage adjustment, which utilizes convenient and scientific calculating and calibrating methods.

Material	Model	Outer Dimension (mm)	Connectim	IP
Stainless steel	12 Input 1 Output	236x166x46(A)	Bridge	IP65
Stainless steel	10 Input 1 Output	236x166x46(A)	Bridge	IP65
Stainless steel	8 Input 1 Output	236x166x46(A)	Bridge and Signal	IP65
Stainless steel	6 Input 1 Output	236x166x46(A)	Bridge and Signal	IP65
Stainless steel	4 Input 1 Output	236x166x46(A)	Bridge and Signal	IP65
Stainless steel	4 Input 1 Output	178x111x35(C)	Bridge and Signal	IP65
ABS	4 Input 1 Output	170x100x35(F)	Bridge and Signal	IP67
ABS Water Proof	4 Input 1 Output	210x130x38(T)	Bridge and Signal	IP67
