HQD Portable Meters

The ultimate meter/probe system offering flexibility and ease of use with interchangeable probes. Ideal for facilities with multiple users and testing needs.

All HQD meters feature an advanced yet simple user interface that does not require manuals or training to operate. HQD meters connect with smart Intellical probes and automatically recognize the testing parameter, calibration history, and method settings to minimise errors and setup time. The durable portable meter and optional rugged probes are designed to withstand years of use in the field.

A wide variety of Intellical laboratory electrodes are available to meet the most demanding laboratory applications. Intellical Red Rod pH electrodes offer exceptional performance and response time across a wide variety of sample types. The LBOD probe utilises optical technology to provide fast, accurate Dissolved Oxygen measurements while dramatically reducing maintenance costs. Additional probes for Conductivity, Total Dissolved Solids (TDS), Ammonia, Ammonium, Fluoride, Nitrate, Sodium, and RedOx (ORP) measurements complete the Intellical portfolio.

Choose from 4 models, including the dual-input HQ40D and single-input HQ30D versions. These multi-parameter meters offer the ultimate in measurement versatility - eliminating the need for multiple meters.

- **Designed for drinking water and wastewater professionals**
- **Does not require manuals or training to operate**
- **Meter automatically sets up the right parameters upon probe connection**
- **Durable, robust design to withstand years of use**
- **Interchangeable probes for measuring pH, Dissolved Oxygen (DO), Conductivity, Total Dissolved Solids (TDS), Ions (ISE), BOD, and RedOx (ORP).**
