

## SKY COUNTER CCF2004

Developed by MHT, one of the renowned specialists in lightning protection, the SKY COUNTER CCF2004 is a dedicated counter for direct lightning strikes. The elegance of the device lies in its no frills simplicity, ease of installation and use.

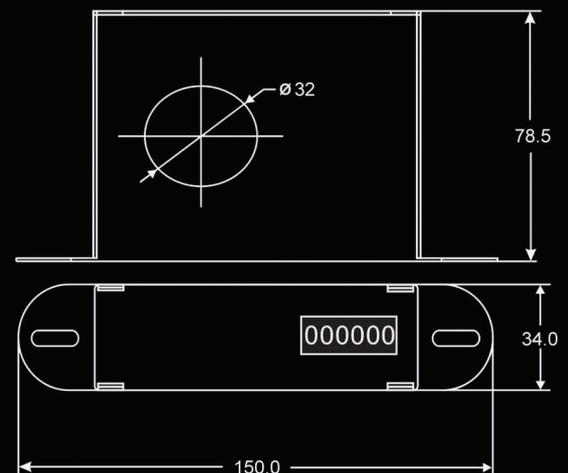

### Features

- Weatherproof for outdoor applications
- No external power required
- Long service life
- High accuracy in direct lightning count
- Wide lightning current measuring range
- Easy to install through simple insertion of the down conductor through the device
- High compatibility with all types of lightning conductors and equipment
- Records surge or lightning event from trigger threshold 500A

### Technical Data

Type	CCF 2004
Counting Current (rise time $\geq 8\mu\text{s}$ )	$> 0.5 \text{ KA}$
Sequence of impulse	$> 1\text{s}$
Display Model	Electromechanical digital display
Indicator	Lightning Event 0~999999
Current Sample Mode	Inductive Probe (Built-in)
Working mode	No battery needed
Operation temperature ( $^{\circ}\text{C}$ )	$-20\sim+60$
Dimension of window (mm)	32
Dimension of counter (mm)	150x78.5x34
Enclosure material	Stainless Steel
Degree of protection	IP67

Dimensions
