**“A perfectly
clear maintenance
solution for plastics”**

CLEARLY BETTER!

www.vuplex.co

Finally...

an easy and effective way
to clean, protect & polish all
clear or colored plastics!

Conventional Plastic Cleaners

Previously, plastic cleaning
products have proven less than
satisfactory. Existing cleaners
are often messy, ineffective
and/or difficult to use. Many
products actually contain
chemicals or abrasives that can
damage the surface of plastic.

Trying is believing

VuPlex® works on countless plastic products,
preventing premature wear while helping them
to look their best. VuPlex® produces a shiny,
cleaner, more lustrous finish with no smears
or smudges. It makes colored plastics vibrant,
clear plastics virtually transparent and plastic
paints gleaming like new.

Of course, there's really only one way to be
convinced about the superiority of VuPlex®:

Try it for yourself!

Use VuPlex® when you're looking for the most
effective cleaner, protectant & polish for any
kind of plastic.

Introducing The Solution

1

VuPlex® effortlessly
removes stains that other
cleaners won't touch, by
applying a micro-thin layer
of protectant, sealing the
porous surface.

2

The polished finish makes
the plastic resistant to
debris, oil, scratches and
yellowing. It also make fine
scratches less visible.

3

Water and other
contaminates are repelled
from the surface giving
added protection. The
residual film is also safe
on food preparation surfaces.

4

The anti-static properties
help to repel dust and
abrasive materials.
