

Scrubmaster E10 / B10

The Scrubmaster E10 and B10 models are compact, robust and easy-to-handle scrubber-driers designed to clean smaller floor-spaces.

Edge-Close working

The protruding cylindrical brush enables edge-close working, rendering time-consuming finishing work unnecessary. The twin cylinder cleans granulated floors and joints for optimum results.

Advanced scrubbing performance

The two cylindrical brushes provide advanced scrubbing performance while the two squeegees

enable simple forward-/backward maneuvering.

Comfortabele fast-replacement system

Each battery system has a net running time of up to 30 minutes. The roller-mounted, no-tools-needed detachable battery systems are very easy to replace.

The built-in battery charger enables recharging at any conventional outlet (B10). The machine is also available as a mains-operated version as Scrubmaster E10.

Coverage

The Scrubmaster E10 and B10 models clean up to 1,400 m² per hour.

Product specification Scrubmaster		E10	B10
Working width	cm	35	35
Squeegee width	cm	45	45
Performance approx.	m ² /h	1400	1400
Drive		mains op.	battery
Voltage	V/Hz	230 AC/50 Hz	24 V/25 Ah
Number of brushes		2	2
Working speed	km/h	4.0	4.0
Fresh water tank	l	10	10
Recovery tank	l	11	11
Weight without battery	kg	44	40
Weight (wet) with battery	kg	54	85
Overall performance	kW	1.45	0.92

Transport and storage

The Scrubmaster E10 and B10 models have a detachable/collapsible tie bar, which saves space when stored away or during transport.
