

ALMAGIS Series

GENERAL

SMC's ALMAG-IS is an insertion-type electromagnetic flowmeter designed to measure the fluid velocity of conductive liquids in applications where hot-tap or insertion installations are preferred. This insertion mag meter is available in four standard lengths and may be installed in any pipeline with internal diameters ranging from 2" to 120" (50~3000 mm) and in permanent locations where cost or space limitations preclude the use of conventional in-line style meters. Available pipe connections include hot-tapped, DIN and NPT threads. The ALMAGIS is designed for use with conductive fluids including water, raw sewage, and wastewater, clarified water, RAS, WAS, primary sludge and cooling tower water, as long as adequate lengths of straight pipe are available where the sensor is installed.

7 FEATURES

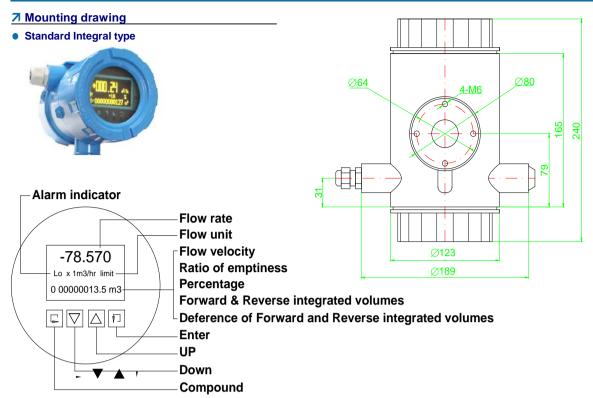

- □ Applicable sizes: 2"~120" (50~3000 mm)
- □ Operating pressure: ≤ 1.6MPa
- Velocity range of 0.5~10m/s
- Accuracy: ±1.5%
- Hot-tap sensor can be installed and retracted from process piping
- Conductivity of measured medium: ≤ 20 µs/cm
- Electrode materials: 316L, Hastalloy, Ti, Ni, Tantalum
- Maximum distance between sensor and converter: ≤50m
- NIST traceable calibration

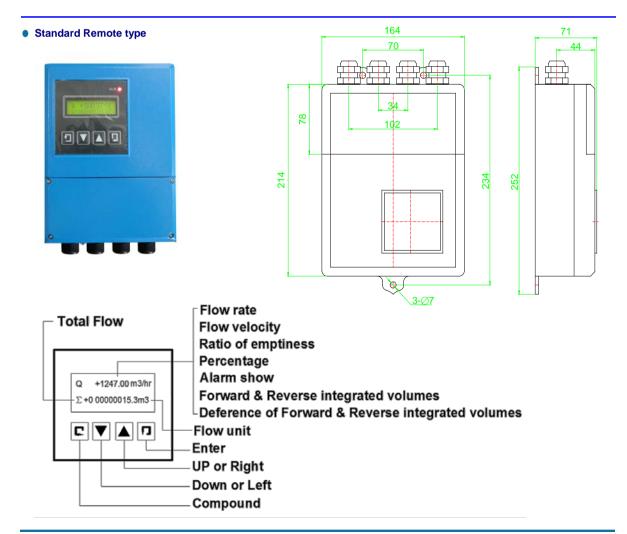

7 SPECIFICATIONS

- Line Size : 2"~120" (50~3000 mm)
- Measuring Range : 0.5 10 m/s -bi-direction
- Connection : Weld, ball valve(threaded and flange)
- Accuracy : ±1.5% of reading (velocity v≥1m/s)
- Temperature up to 248 °F (120 °C) max.
- Pressure up to 230 psig (1.6 Mpa) max.
- Materials of Construction
- Transmitter housing : Aluminum
 - Probe: SS #304 (std), 316L, Ti
 - Electrode : 316L, HC-22, HB3, Ti
- Media Conductivity : > 20 μS/cm

: 2 X PG11 Cable Entry • Ambient Temperature : -13 to 140 °F (-25 to 60 °C) Protection : IP 65 - std IP 68 (Submersible) - only for remote • Grounding Resistance : Must be $\leq 10 \Omega$ Power requirements : 19-36 V_{DC}, 12-15W 85-265 V_{AC} , 45-63 Hz, \leq 20W Outputs : 4-20mA, Pulse, Communication : RS232/485/HART, Modbus Display : Flow rate, flow velocity, percentage, Total flow Total flow

7 DIMENSIONS - Insertion

Calculation of Insertion Height for fixed and retractable types

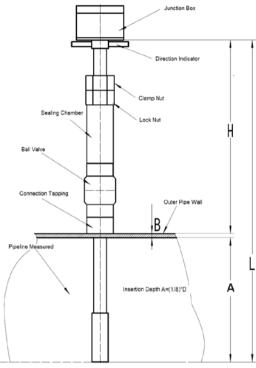

H = L - A - B

H --- insertion height, mm

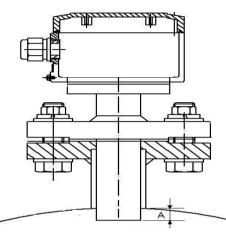

- L --- nominal length of the sensor; L=600mm, 900mm, 1200mm,1500mm
- A --- insertion depth (D/8), mm
- B --- thickness of the pipe wall, mm

Retractable type

Flanged type

	Probe	DN Size Insertion Depth (1/8) *D					
Model	Length (mm)						
EMF-B-600	600	DN50 ~ DN1600					
EMF-B-900	900	DN450 ~ DN4800					
EMF-B-1200	1200	DN1400 ~ DN7200					
EMF-B-1500	1500	DN2000 ~ DN8000					

Insertion Depth A=(1/8)*D

Pipe Size	Insertion Depth (D)= pipe inner diameter (½)*D								
DN50~DN150	(⅓)*D								
DN200~DN600	(½)*D or (½)*D								
DN700~DN8000	(½)*D								

Electromagnetic Flowmeter

** Please contact your local Smart Measurement application engineer

You also need to pro	rovide the following information:
----------------------	-----------------------------------

Type of Fluid	Please provide the name of your fluid						
Full Scale Flow	Maximum and minimum flow rates; units must be in GPM, LPM or m ³ /hr, etc						
Line Size	Please provide pipe size as well connection type (flanged, threaded, etc)						
Pressure & Temperature	We will calibrate your flowmeter as close to your operating conditions as possible
