

手動操控閥

● 限制當液壓泵浦迴路時產生的壓力,以保護其他零配件。

當到達預設壓力的情形下,閥打開。

● 順時針旋轉手柄,增壓設定。

包含: 1. 3ft. 迴油油管套件

2. 3%的重複性

3. 800-10,000 psi 調整範圍

Manually Operated Check Valve

※ Limits pressure developed by the pump in hydraulic circuit, thus limiting the force created by other component.

Valve opens whenever preset pressure is reached.

※ To increase pressure setting, turn handle clockwise.

Include: 1. 3 ft. return line hose kit

2. $\pm 3\%$ repeatability

3. 800-10,000 psi adjustment range.
