Hydraulic Compression Tools - EP-520C

The EP-520C is a single acting, 30 metric ton press that is designed to compress sleeves and lugs up to 520mm². The EP-520C remote head requires an external bar or 10,000 PSI pumping source. Simple and rigid frame type construction makes the press lighter yet durable.

SPECIFICATIONS:

- **RAM STROKE (mm):** 26
- **OUTPUT FORCE (Metric Ton):**
- **HEIGHT (mm):** 380
- **WIDTH (mm):** 125 (dia)
- **WEIGHT (kg):** 17.5

- Dies are sold separately
- Simple and compact design
- Yoke type head
- 30 metric ton output

- Positive die locking mechanism
- Oil volume required: 132cc.

ACCESSORIES:

- Steel carrying case with die case
