

SUPERFLEX WELDING CABLES

TRANSARC 'SUPERFLEX' is a premium grade copper welding cable which offers flexibility over a wide range of environmental conditions and performance benefits over welding cables previously available to the welding industry.

These features when combined with sequential metre marking and distributor friendly spool packaging result in one of the best welding cables available today.

TRANSARC 'SUPERFLEX' is resistant to attack from most chemicals found in welding related environments as well as sea water, ozone and ultra violet rays.

STANDARD DOUBLE INSULATED

16mm ² 150M Spool	250A @ 30%	Part No. 7901220
25mm ² 150M Spool	333A @ 30%	Part No. 7901221
35mm ² 100M Spool	416A @ 30%	Part No. 7901222
50mm ² 100M Spool	527A @ 30%	Part No. 7901223
70mm ² 50M Spool	655A @ 30%	Part No. 7901224
95mm ² 50M Spool	794A @ 30%	Part No. 7901225

MIG PLIERS

A universal tool suitable for loosening or tightening contact tips, rapid and precise cutting of welding wire, time-saving cleaning of protective gas nozzles and removal of protective gas nozzles

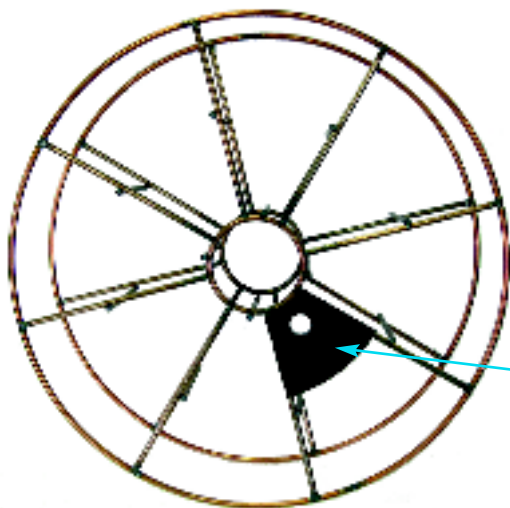

Size No 1 - Nozzle I.D. 12-15mm

Part No. 705000

Size No 2 - Nozzle I.D. 15mm & above

Part No. 705001

WIRE SPOOL LOCATING BLOCK

Wire Spool Locating Block

Part No. 715001

- ▲ Fits steel welding wire spools: aluminium, stainless steel, hardfacing
- ▲ Provides an accurate locating hole for the wire feeder spool hub locating pin
- ▲ Prevents any 'backlash'
- ▲ Assists in smooth feedability
