

Lufkin®

PRO SERIES

BUILT TO LAST.™

Long tapes that adapt
to the job you're doing.

Interchangeable end attachments
for the ultimate in versatility.
A design breakthrough.
Only from Lufkin.

COOPER Hand Tools

It's simply the most versatile fiberglass long tape ever made.

Folding Hook provides the most accurate measurement on squared-off, medium-hard starting points; closes for accurate inside measuring.

Extra large Appraiser's Hook is coated with soft rubber for extra holding power on hard, smooth surfaces.

Ring Attachment clips onto supplied 8 1/2-inch anodized aluminum stake for easy one-person long-distance measuring.

Here's why: We began by looking at how long tapes are used. We compared that to how they're designed. Although they are used quite differently, they're all designed basically the same. Same frame, same end hook, same everything.

So we wondered "How can we make a long tape that simply works better?"

And after a good amount of time and a lot of merely good ideas, we came upon a simply great one: interchangeable end attachments that allow the tape to adapt to different user needs. Each attaches to the tape with a snap-fit fastener like you find on backpacks and kids toys. Simple and tough.

interchangeable
end attachments

Three different end attachments provide a workable solution for just about every measuring situation:

folding When open, the folding hook has sharp gripping teeth that really bite into wood and other soft surfaces. In its closed position, it can be used to accurately measure inside dimensions.

appraiser's The larger, soft rubber coated appraiser's hook holds on in situations where the starting point is tougher to grip, like the hard, smooth surface of a gutter downspout.

ring When you're working alone, you'll appreciate the ring attachment. Just snap it onto the supplied anodized aluminum stake and you're set to do some serious one-person long-distance measuring.

Diagram indicates measurements start point for each end attachment.

Easy-to-read 3/4-inch wide two-color blade shows feet (in 10ths and 100ths) on one side; inches (in 16ths) and feet on the other

Blade is made of 60 strands of fiberglass encased in two layers of PVC for extra long life

Rust-proof fiberglass blade is waterproof, kink-proof, resists dirt and wipes clean easily

**NO SKINNED
KNUCKLES!**

Ample knob/handle clearance

Integrated storage
securely holds all
three end attachments

We think you'll find the interchangeable end attachments on the new Lufkin® Pro Series fiberglass long tapes make them the most versatile long tapes you've ever used. But that's only half the story. Read on to find out how these new tapes are as handy and easy to use as they are versatile.

8 1/2-inch anodized aluminum
stake clips securely to
back side of tape

Soft, sure-grip handle
provides extra comfort
and control

3:1 gear ratio winder
retrieves blade faster
to save time

Shock-absorbing cushion
inserts provide extra
protection to frame

Rotating mouthpiece reduces blade
stress for longer life and helps
maintain blade alignment

Two-sided versatility...
decimal and feet/inches

Yellow side shows feet in 10ths and 100ths

White side shows inches in 16ths and feet

Long tapes that adapt to your job.

New interchangeable end attachment Pro Series Fiberglass Long Tapes. Only from Lufkin®.

Introducing three new Lufkin® fiberglass long tapes. Each features Lufkin's revolutionary new end attachments, so whether you use a 100-foot, 200-foot, or 300-foot tape, you'll get the convenience, versatility, and time-savings of this groundbreaking new design concept.
