TTX

Semiautomatic plastic strapping machine

The TTX is the ideal plastic strapping system for low volume users. Its simple open cabinet, bottom seal design makes it ideal for strapping bundles, cartons or coiled products.

Easy to operate

The TTX's strapping head features cam-operated feeding, retracting and tension for easy operation. Its external tension control and setting indicators further simplify operation.

Simplified maintenance

Constructed with electrical safety interlocks on the hinged top plate, when the TTX's top cover is opened, all power to the machine is cut off for easy troubleshooting.

Reliable performance

The sensor controlled heat sealing mechanism ensures consistent, high-efficiency seals. Weld cooling time can be adjusted for proper sealing. Package guides ensure ideal strap placement.

Durable

The TTX features a welded steel frame with stainless steel top plates for maximum durability.

Portable

Four locking casters enable the machine to be positioned wherever needed.

TTX Specifications

Package size:
