

PZ-9 (PZJ) Drilling Pump

SPECIFICATIONS

Maximum Input	1,000 BHP (746 kw)
Maximum RPM	130 RPM
Stroke Length	9" (229mm)
Piston Load	101,550 lbs. (451,717 N)
Pump Weight	24,368 lbs. (11,075 kg) average
Gear Ratio	4.48 :1

PISTON CYLINDER		DISPLACEMENT – DRILLING SERVICE				MAXIMUM PSI		PUMP RPM	JACKSHAFT RPM
DIAMETER		PER REVOLUTION		MAXIMUM FLOW RATE		PSI	bar

PZ-9 (PZJ) Drilling Pump

Standard Drilling Pump Configuration shown.
Other motor configurations available.

OPTIONAL FEATURES

- Steel transportation and placement skid for pump only or larger maintenance skid with non-slip decking
- Centrifugal suction charging pump
- Suction stabilizer and/or discharge damper
- External electric-powered lube pump
- Fabricated, log-style suction manifold
- Full open valve seats
- Custom packaging available

STANDARD FEATURES

- High-strength, cast nodular iron power frame, eccentric, connecting rods, and crossheads
- Full roller-bearing construction a eccentric mains, jackshift, connecting rods, and crosshead pins
- Heat-treated alloy steel, double helical AGMA drive gears
- Double extended jackshift for mounting sheaves or sprockets
- Replaceable bronze crosshead slides
- Splash lubrication with internal lube pump supplying pressurized oil to bearings, gears, and crosshead slides
- Ultra compact, heat-treated alloy steel, valve over valve, interchangeable fluid end modules
- Hydrostatic-tested cast steel discharge manifold
- API suction and discharge connections
