

The Industry's Toughest Packing

Manufactured with state of the art materials, Gardner Denver delivers packing with exceptional wear and temperature characteristics. Constructed with proprietary blends and coated with high performance compounds, Gardner Denver's packing is designed to withstand the highest pressure, reduce friction, improve abrasion resistance and provide long life in the field. And with 24/7 customer service and stocking near you, we can deliver inventory quickly accommodating almost any frac or well servicing pump. Pair Gardner Denver packing with our OEM plungers and OEM valves and seats for the ultimate pumping performance.

OEM Packing FEATURES & BENEFITS

- Built with state of the art materials such as Kevlar® for long life
- Exceptional wear and temperature characteristics
- Constructed with proprietary material blends and compounds for superior performance
- Fabrics coated with high performance compound for improved abrasion resistance
- Designed to withstand extreme pressures
- New, proprietary material and special manufacturing processes deliver even longer life
- Available for Gardner Denver and competitor frac and well-servicing pumps

Built to last, delivered fast. Combine Gardner Denver's OEM plungers with our OEM packing and valves and seats for the total package of durable, high-quality consumables.
