## LATHE SERIE WORKING RANGES (UNIVERSAL TOOLS)

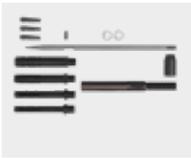

# Wide range of accessories

## KRAIS SPECIALIZED TUBE MILLING HEADS

In order to increase the boiler and heat exchanger work efficiency, we have designed and manufactured milling heads for various purposes. Our offer includes heads for strength and seal weld removal, membrane removal, facing, bevelling, fin fan cooler facing or weld removal and many more, all of which can be found in this catalogue. In the case you do not find the head for your application, let us know and we can design it for you.

## SHAFTS

### **MINISHAFT**

A system with interchangeable guide shafts. A complete set covers 12,4 to 48,0 mm ID tubes.

### **MICROSHAFT**

A system with interchangeable guide shafts. A complete set covers 10,0 to 15,0 mm ID tubes.

### **SHAFT20/25/30**

Self-align, heavy duty locking systems. Shafts and jaws are longer and wider to ensure maximum clamping force.

## SPEED ADJUSTMENTS

### **SPEED VALVE SAV500**

Perfect solution for all our pneumatic driven bevelling machines for adjusting cutting speed to suit to the machined tube diameter.

### **SPEED REDUCER - GEARBOX**

The optional speed reducer can be used for seal and strength weld removal applications. Inconel, duplex, super duplex and other hard to machine alloys can be machined with ease. The reduction of speed by a factor of 3 increases the torque, enabling the machine to generate a thick chip whilst reducing the cutting time. This combination increases the lifespan of the components significantly and reduces cutting time. The gear box can be purchased separately. Installation is easy: just remove the angle head from the drive and install the reduction assembly.

## FEED SYSTEMS

### **LEVER FEED**

Quick and easy feed system. Used in many basic applications.

### **STAR WHEEL**

The most precise feed system. Used in many basic and demanding applications.

### **RATCHET FEED**

Feed system allowing to work in narrow and tight locations, eg. in water walls.

## FAST CLAMPING SYSTEM

The fast pneumatic clamping system (optional) is ideal for manufacturing plants that make large amounts of end preps on tubes and pipes. It offers rapid tube to tube cycle time, increased productivity with little operator fatigue. The system can be used for tube facing on condensers and heat exchangers, boiler tube panel fabrication, seal weld removal.

## HYDRAULIC POWERPACK

Our hydraulic Powerpack ensure reliable power for our SFSF Clamshells. Featuring a powerful electric motor the system provides adjustable volume, constant low pressure and responsive pumps. This adds up to optimum power delivery as required by clamshells that are designed to machine a wide range of pipe sizes and materials.

## COMPLETE SET

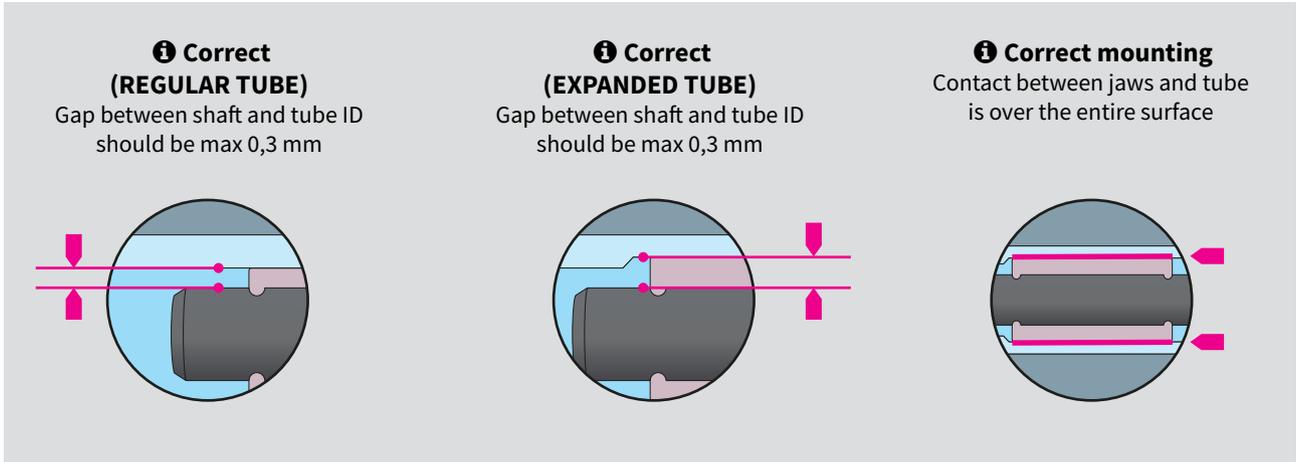

The machines are shipped complete with a standard cutting head, a mandrel kit with full set of jaws, a hose with couplings, an instructions manual, operating tools and a rugged metal carrying case.

# How to proper lock

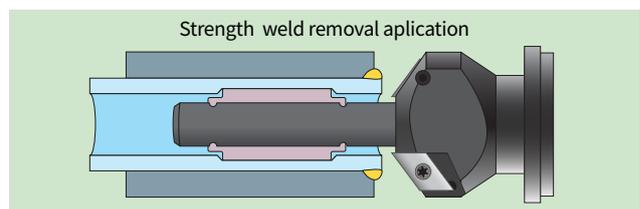

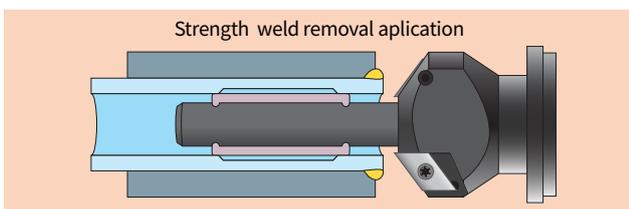

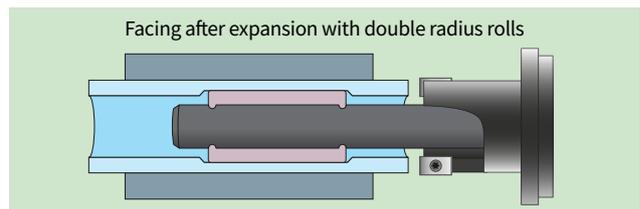

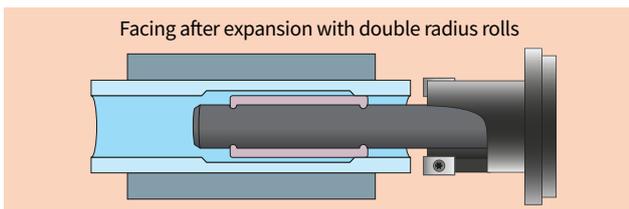

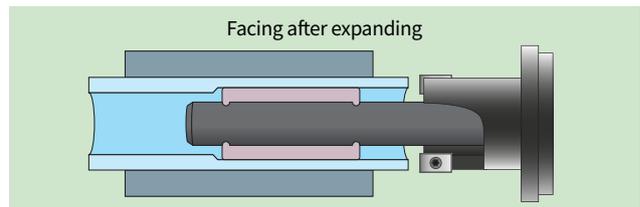

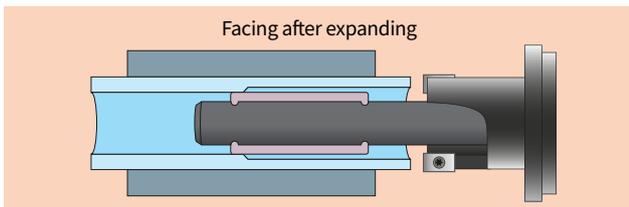

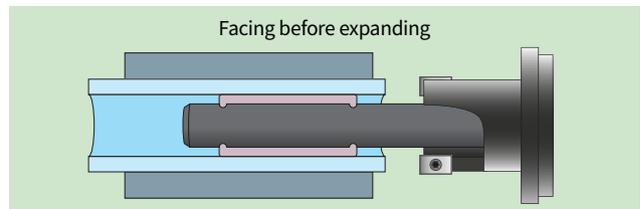

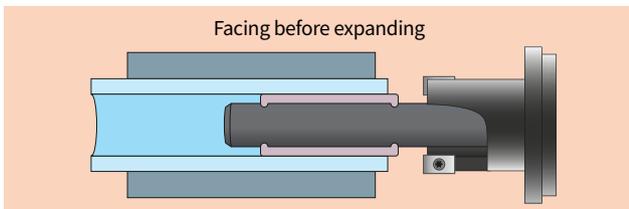

**FOR: MINIMILL 101, MINIMILL 201, MINIMILL 301LP AND AUTO MINIMILL WITH MICRO- OR MINISHAFT.**

In order to obtain the best possible centering of the MiniMill into the faced, bevel or weld removal tube, we recommend to select the shaft with diameter closest possible to the inner diameter of tube.

**✘ WRONG JAWS SETUP**

**✔ CORRECT JAWS SETUP**

# Correct shaft choice

**FOR: MINIMILL 101, MINIMILL 201, MINIMILL 301LP AND AUTO MINIMILL WITH MICRO- OR MINISHAFT.**

In order to obtain the best possible centering of the MiniMill into the faced, bevel or weld removal tube, we recommend to select the shaft with diameter closest possible to the inner diameter of tube.

If the shaft is too thin it is exposed to large probability that the MiniMill will be installed non parallel to the axis of the tube. As well as the jaws may not fully grip the tube with its full face but with the corners only, and will result a non-square face of the tube to the tube sheet as well as there is a big probability that it may result the breaking of guide shaft as the machine might be forced into strong vibration what may created a sudden collision with tube or tube sheet. We strongly recommend to look on this, specially for tubes 3/4" O.D.

**IMPORTANT NOTE!**  
The guide shafts in the chart are selected for non-expanded tubes. If the tubes are expanded, a different, bigger diameter shaft has to be considered. As well as the contact length of the locking jaws has to be shorter than the length of the effective expansion length. It is unacceptable if the jaws are longer than the expansion and lock only partially on non-expanded part of tube. In that circumstances the locking jaws must be shaped to be able to lock only on the expanded part of the tube.

We do offer non-standard size and non-standard shaped jaws upon receiving a drawing of the tube expansion details.

# PrepMill

The PrepMill series pneumatic tube facing, bevelling and weld removal machine. The PrepMill is a rugged, fast, portable weld end preparation lathe for various tubes including stainless steel and other high chromium alloys. Machine is constructed on two opposite set up taper roller bearings that makes the machine extremely stable and very rigid and compact. A standard machine is equipped to cover 25 to 122 mm ID (1" to 4,8") with a 116 mm cutter head.

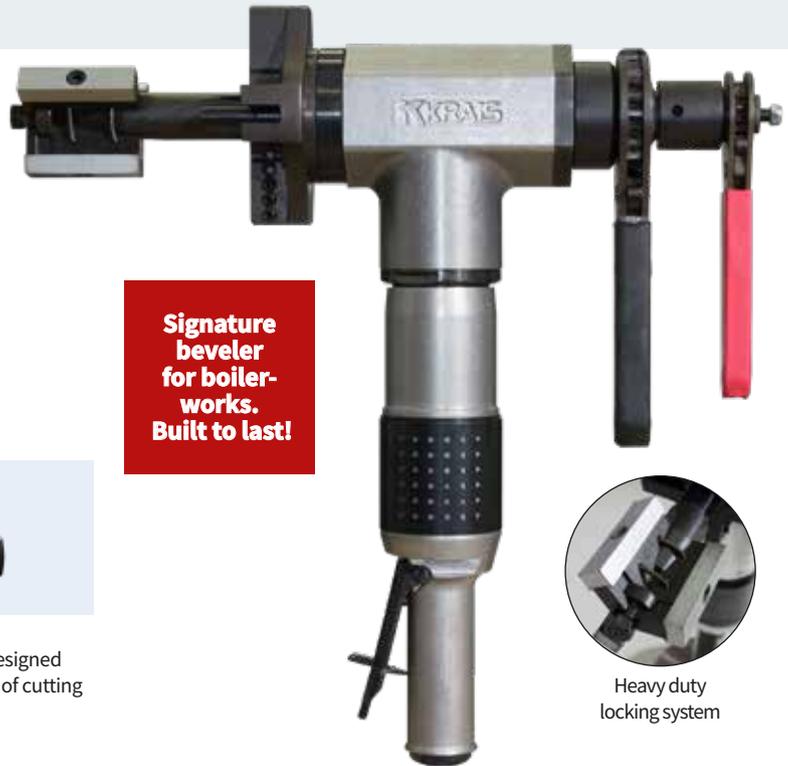

### STANDARD SET UP

**SHAFT25**  
Self-align, heavy duty locking system. Shafts and jaws are longer and wider to ensure maximum clamping force.

**116 MM (4,56")**  
The large cutter head, designed to fasten the wide range of cutting inserts.

**Signature beveler for boiler-works. Built to last!**

Heavy duty locking system

STANDARD WORKING RANGE		TOTAL WORKING RANGE	
APPLICATION RANGE	STANDARD LOCKING	APPLICATION RANGE	STANDARD LOCKING
25 – 127 mm	25 – 122 mm	20 – 127 mm	20 – 122 mm
1 – 5"	1,0 – 4,8"	0,787 – 5"	0,787 – 4,8"
FEED STROKE		FREE SPEED	
25 mm	1"	120 rpm	TORQUE
			140 Nm
			105 Ft.lbs
AIR USE		BODY HEIGHT	
55 cfm	1,3 m <sup>3</sup> /min	14,5"	370 mm
BODY WIDTH		BODY WEIGHT	
2,59"	66 mm	20,5 Lbs	9,5 kg

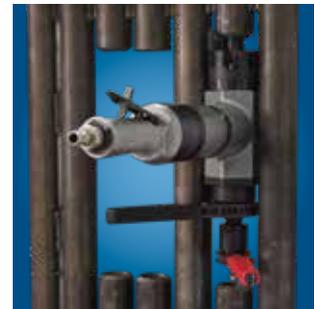

### PREPMILL-E

PrepMill-E is electric version of PrepMill. A standard machine can cover the same pipe sizes and comes with the same cutting head. The electric motor made by Makita with 3 stage planetary gear box made by KRAIS has variable speed control and produce enormous torque. Is interchangeable with pneumatic drive and can be purchased separately at any time.

- Free Speed ..... 115 RPM
- Power ..... 750 W
- Torque ..... 368 Nm (280 Ft.Lbs)
- Feed Stroke ..... 25 mm (1")

### EXAMPLE TOOL APPLICATION

PrepMill with its 66 mm (2-5/8) width body perfectly fit into limited access areas such as Water wall panels. Easy to clamp and feed with our heavy duty ratchet or star wheel feed.

**OPTIONAL HEADS**

**66 MM (2,59")**  
The smallest cutter head, designed to fasten the wide range of cutting inserts.

**88 MM (3,46")**  
The popular, medium cutter head, designed to fasten the wide range of cutting inserts.

**OBPM**  
Head for outside bevelling of tubes and pipes. Available in wide range of diameters and beveling angles.  
→ TABLE PAGE 63

**PRRMBH**  
Head for membrane and overlay removal. Efficiently remove material between boiler tubes.  
→ TABLE PAGE 63

**STWRPM**  
Head dedicated for strength weld removal. Heads are easy to align and sized per tube diameter.  
→ TABLE PAGE 64

**TFPM**  
Tube facing milling head for tubes made of any type of material. Utilizes 6% cobalt inserts.  
→ TABLE PAGE 64

**OPT. SHAFT**

**SHAFT20**  
Self-align, heavy duty locking system. Shafts and jaws are longer and wider to ensure maximum clamping force.

**OTHER OPTIONAL ACCESSORIES**

**HEAD FLANGE**  
Adapter to use all MiniMill's special cutter heads (from size 1-1/2" and up).

**SPEED ADJUSTMENT VALVE SAV-500**  
The solution for all pneumatic drive beveling machines. Allows adjusting cutting speed to suit to the machined tube diameter.

**SPEED REDUCER**  
Easy to use gearbox for 3x speed reduction. Increases the torque, enabling the machine to generate a thick chip whilst reducing the cutting time.

**FAST CLAMPING SYSTEM**  
System offers rapid tube to tube cycle time, increased productivity (up to 4x) with little operator fatigue. Ideal for large amount of end preps.

**STAR WHEEL**  
The most precise feed system. Used in many basic and demanding applications.

**EXAMPLE TOOL APPLICATION**

# MiniMill 101

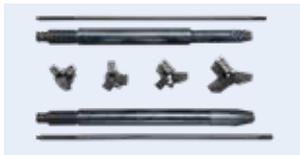

The MiniMill 101 is a rugged, fast, portable weld end preparation lathe designed for various tubes and pipes, including stainless steel and other high chromium materials. Our standard machine can be used for pipe sizes of 20 - 74 mm i.d. (0.787" - 2.913") and comes with a 88 mm cutting head.

**IMPORTANT!**

Read how to properly lock on page 7

**STANDARD SET UP**

**SHAFT25**

Self-align, heavy duty locking system. Shafts and jaws are longer and wider to ensure maximum clamping force.

**88 MM (3,46")**

The popular, medium cutter head, designed to fasten the wide range of cutting inserts.

# MiniMill 201

The MiniMill 201 is a rugged, fast, portable weld end preparation lathe for various tubes including stainless steel and other high chromium alloys. A standard machine comes complete with a 60 mm head, a locking system and includes all jaw sets to cover sizes of 20 to 44 mm (0.787" to 1.732")

**IMPORTANT!**  
Read how to properly lock on page 7

### STANDARD SET UP

**SHAFT20**  
Redesigned heavy duty locking system. Shafts and jaws are longer and wider to ensure maximum clamping force. The jaws are self-align.

**60 MM (2,36")**  
The smallest cutter head, designed to fasten the wide range of cutting inserts.

STANDARD WORKING RANGE – RECOMMENDED		OPTIONAL WORKING RANGE					
APPLICATION RANGE		STANDARD LOCKING		APPLICATION RANGE		STANDARD LOCKING	
20 – 51 mm		20 – 48 mm		10 – 51 mm		10 – 48 mm	
0,787 – 2,008"		0,787 – 1,890"		0,394 – 2,008"		0,394 – 1,890"	
FEED STROKE		POWER		FREE SPEED		TORQUE	
20 mm	0,787"	1,3 hp		200 rpm	72 Nm	53 Ft.lbs	
AIR USE		BODY WIDTH		BODY HEIGHT		BODY WEIGHT	
55 cfm	1,3 m³/min	2,32"	59 mm	13,1"	335 mm	11,4 Lbs	5,2 kg

### EXAMPLE TOOL APPLICATION

Standard locking system with handle feed makes quick work of trimming back tubes.

Completed strength weld removal.

Facing, bevelling tubes quickly and safely.

**OPTIONAL HEADS**

**88 MM (3,46'')**  
The popular, medium cutter head, designed to fasten the wide range of cutting inserts.

**OBMH**  
Outside bevelling of both tubes and pipes. Sized per tube or pipe diameter and angle of required weld bevel.  
→ **TABLE PAGE 61**

**SWROTC**  
Seal weld removal head over tube circumference prior to re-welding the damaged joint without removing the tube.  
**TABLE PAGE 62**

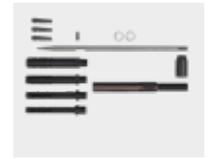

**STWRMH**  
Custom designed head dedicated for strength weld removal. Heads are sized per tube diameter.  
→ **TABLE PAGE 60**

**OPTIONAL SHAFTS**

**MICROSHAFT**  
A system with interchangeable guide shafts. A complete set covers 9,0 to 15,0 mm inside diameter.

**MINISHAFT**  
A system with interchangeable guide shafts. A complete set covers 12,7 to 25 mm inside diameter.

**OTHER OPTIONAL ACCESSORIES**

**FAST CLAMPING SYSTEM**  
System offers rapid tube to tube cycle time, increased productivity (up to 4x) with little operator fatigue. Ideal for large amount of end preps.

**SPEED REDUCER**  
Easy to use gearbox for 3x speed reduction. Increases the torque, enabling the machine to generate a thick chip whilst reducing the cutting time.

**SPEED ADJUSTMENT VALVE SAV-500**  
The solution for all pneumatic drove beveling machines. Allows adjusting cutting speed to suit to the machined tube diameter.

**LEVER FEED**  
Quick and easy feed system. Used in many basic applications.

**RATCHET FEED**  
Feed system allowing to work in narrow and tight locations, eg. in water walls.

# MiniMill 301LP

The fastest and strongest facing machine on the market. Engineered for safety and ease of use, featuring a pneumatic locking system with a double piston cylinder. Compact milling head with double cutting edge inserts with 6% cobalt. For all types of material including: ferrous, non-ferrous, stainless and exotic alloys steel, duplex, inconel and titanium.

**IMPORTANT!**  
Read how to properly lock on page 7

### STANDARD SET UP

**MINISHAFT**  
A system with interchangeable guide shafts. A complete set covers 12,4 to 48,0 mm ID tubes.

**60 MM (2,36")**  
The smallest cutter head, designed to fasten the wide range of cutting inserts.

STANDARD WORKING RANGE – RECOMMENDED		OPTIONAL WORKING RANGE					
APPLICATION RANGE	STANDARD LOCKING	APPLICATION RANGE	STANDARD LOCKING				
12,4 – 38,0 mm	12,4 – 24,0 mm	10 – 51 mm	10 – 48 mm

20 mm	0,787"	1,3 hp		300 rpm		43 Nm	32 Ft.lbs
AIR USE		BODY WIDTH		BODY HEIGHT		BODY WEIGHT	
55 cfm	1,3 m³/min	2,32"	59 mm	13,1"	335 mm	15,4 Lbs	7 kg

### EXAMPLE TOOL APPLICATION

The fast locking and the handle feed make this system very efficient for heat exchanger manufacturers.

### EXAMPLE TOOL APPLICATION

A real application: shortening a bundle. MiniMill can deal with this task quickly and efficiently.

Double sided inserts and fixed diameter heads ensure unsurpassed efficiency and quality. Mechanical stops ensure identical tube projection.

**OPTIONAL HEADS**

**TFMH**  
Tube facing milling head for tubes made of any type of material. Utilizes 6% cobalt inserts.  
→ TABLE PAGE 60

**MMFH**  
Tube facing milling head for tubes made of hardest type of materials. Utilizes carbide inserts with 4 blades.  
→ TABLE PAGE 62

**STWRMH**  
Head dedicated for strength weld removal. Heads are easy to align and sized per tube diameter.  
→ TABLE PAGE 60

**OPTIONAL SHAFTS**

**MICROSHAFT**  
A system with interchangeable guide shafts. A complete set covers 9,0 to 15,0 mm inside diameter.

**SHAFT20**  
Self-align, heavy duty locking system. Shafts and jaws are longer and wider to ensure maximum clamping force.

**OTHER OPTIONAL ACCESSORIES**

**SPEED ADJUSTMENT VALVE SAV-500**  
The solution for all pneumatic drive beveling machines. Allows adjusting cutting speed to suit to the machined tube diameter.

**SPEED REDUCER**  
Easy to use gearbox for 3x speed reduction. Increases the torque, enabling the machine to generate a thick chip whilst reducing the cutting time.

**STAR WHEEL**  
The most precise feed system. Used in many basic and demanding applications.

# HyperMill 56

Powerful pneumatic tube facing, bevelling and weld removal machine. The HyperMill 56 is a rugged, fast, portable weld end preparation lathe for various tubes and pipes, including stainless steel and other high chromium materials. A standard machine is equipped with a solid locking system to cover most common tube sizes.

Heavy duty locking system

### STANDARD SET UP

#### SHAFT30

Self-align, heavy duty locking system. Shafts and jaws are longer and wider to ensure maximum clamping force.

#### 135 MM (5,3")

The large cutter head, very sturdy and rigid, designed to fasten the wide range of cutting inserts.

STANDARD WORKING RANGE – RECOMMENDED		OPTIONAL WORKING RANGE					
APPLICATION RANGE	STANDARD LOCKING	APPLICATION RANGE	STANDARD LOCKING				
30 – 136 mm	30 – 136 mm	20 – 175 mm	20 – 166 mm				
1,181 – 5,354"	0,181 – 4,354"	0,787 – 6,890"	0,787 – 6,535"				
FEED STROKE		POWER		FREE SPEED		TORQUE	
40 mm	1,6"	1,3 hp		55 rpm		280 Nm	210 Ft.lbs
AIR USE		BODY WIDTH		BODY HEIGHT		BODY WEIGHT	
55 cfm	1,3 m <sup>3</sup> /min	3,22"	82 mm	15"	385 mm	19 Lbs	9 kg

### HYPERMILL 56E

HyperMill 56E is electric version of HyperMill 56. The machine can cover the same pipe sizes and comes with the same cutting head. The electric motor made by Makita with 3 stage planetary gear box made by KRAIS has variable speed control and produce enormous torque. Is interchangeable with pneumatic drive and can be purchased separately at any time.

- Free Speed .....58 RPM
- Power .....1500 W
- Torque .....720 Nm (530 Ft.Lbs)
- Feed Stroke .....40 mm (1,6")

### EXAMPLE TOOL APPLICATION

**OPTIONAL HEADS**

**116 MM (4,56")**  
The large cutter head, designed to fasten the wide range of cutting inserts.

**175 MM (6,89")**  
Cutter head special for the largest machines, designed to fasten the wide range of cutting inserts.

**HMRBMH**  
Head for membrane and overlay removal. Efficiently remove material between boiler tubes.  
→ TABLE PAGE 65

**OPTIONAL SHAFTS**

**SHAFT20**  
Self-align, heavy duty locking system. Shafts and jaws are longer and wider to ensure maximum clamping force.

**SHAFT25**  
Self-align, heavy duty locking system. Shafts and jaws are longer and wider to ensure maximum clamping force.

**OTHER OPTIONAL ACCESSORIES**

**SPEED ADJUSTMENT VALVE SAV-500**  
The solution for all pneumatic drive beveling machines. Allows adjusting cutting speed to suit to the machined tube diameter.

**SPEED REDUCER**  
Easy to use gearbox for 3x speed reduction. Increases the torque, enabling the machine to generate a thick chip whilst reducing the cutting time.

**RATCHET FEED**  
Feed system allowing to work in narrow and tight locations, eg. in water walls.

**HEAD FLANGE**  
Adapter to use all MiniMill's special cutter heads (from size 1-1/2" and up).

**LOCKING RANGES WITH DEFAULT SHAFT30**

# Auto MiniMill 101P

Auto MiniMill 101P is a fully automatic machine, controlled by a built-in, fully pneumatic control box, with adjustable feed rate and actuated by a hand button (foot switch optional). Ideal for repetitive work cycles on condensers and heat exchangers, as well as for bevelling and facing boiler tubes (100 Rpm configuration). AutoMiniMill 101P is specially designed for trimming and weld removal. This tool is based on the MiniMill 101; it is a fast facing and end preparation lathe designed for various tubes including stainless and other high chromium alloys. It works with all MiniMill 101 compatible cutter heads.

**IMPORTANT!**  
Read how to properly lock on page 7

### STANDARD SET UP

**TFMH**  
Tube facing milling head for tubes made of any type of material. Utilizes 6% cobalt inserts.

### EXAMPLE TOOL APPLICATION

# PanelMill

The PanelMill attaches to the tube outside diameter by means of custom or specific clamp type jaws that provide strong clamping action that minimizes chatter and vibration.

Rugged construction allows the tool's cutting blade to end prep quickly. Several cutter heads are available for tubes with up to 2-1/2" O.D. Both the clamp and cutter heads are extremely durable and easy to change.

The ratchet feed arm enables the operator to comfortably feed the tool during bevelling or facing. The PanelMill is suitable for small bore heavy wall tubes with a high percentage of chrome, stainless steel, and other exotic alloys. Standard and custom made blades are offered in a wide variety of angles and sizes.

## MACHINING IN EVERY POSITION

PanelMill can be rotated through 180 degrees to work in every position. Machine can be used for standard beveling application and for opposite tubes.

## UNIVERSAL DRIVE PLACEMENT

Adjustable drive position is a standard feature of this machine. No additional components are required.

**UNIVERSAL CUTTER HEADS**

**50 MM (1,97'')**  
Head supplied with PanelMill 63. Designed to fasten wide range of cutting inserts.

**63 MM (2,48'')**  
Head supplied with PanelMill 100. Designed to fasten wide range of cutting inserts.

**BIT & HOLDERS**  
Universal cutter heads can hold a wide range of holders, with a bunch types of bits.  
→ TABLE PAGE 71

**OPTIONAL HEADS**

**OBPMH**  
Head for bevelling tubes without membranes in the boiler water walls.  
→ TABLE PAGE 65

**PMRBMH**  
Head for membrane and overlay removal. Efficiently remove material between boiler tubes.  
→ TABLE PAGE 65

**OTHER OPTIONS**

**SPEED ADJUSTMENT VALVE SAV-500**  
The solution for all pneumatic drove beveling machines. Allows adjusting cutting speed to suit to the machined tube diameter.

**JAWS FOR PANELMILL**

JAWS NO.	TUBE OD	
	[MM]	[INCH]
300 PM#2	19,05	0,750
301 PM#2	20,00	0,787

342 PM#2	63,50	2,500
346 PM#2	76,20	3,000

**PANELMILL-E**

PanelMill E is electric version of PanelMill. A standard machine cover the same pipe sizes and comes with the same cutting head. The electric motor made by Makita with 3 stage planetary gear box made by KRAIS has variable speed control and produce enormous torque. Is interchangeable with pneumatic drive and can be purchased separately at any time.

Free Speed ..... 115 RPM  
Power ..... 1,1 Hp  
Torque ..... 366 NM (280 Ft.Lbs)  
Feed Stroke ..... 20 mm (0,787'')

# PanelMill PF

**The first one in the world! OD clamp pipe beveling machine with Positive Feed.**

KRAIS PanelMill PF is the first machine where the beveling cycle time is not dependent on an operator efficiency but on the machine mechanism. Both, the feed mechanism and the spindle rotation mechanism are driven from one source. A fixed rate of spindle advancement is achieved for each rotation of the spindle so every stroke cycle is predictable. The standard machine has 35 mm feed stroke (longer ones are available as option).

PanelMill PF – positive feed beveling machine, is highly recommended for tube end facing, beveling, and membrane milling in water wall panels. As well as for the tube end preparation in the boiler and heat exchanger industry and FAB shops.

## STANDARD SET UP

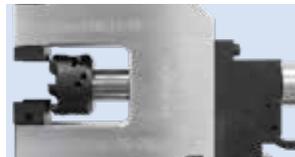

### CUTTER HEAD 66 MM

Cutter head thanks to special way of fixing with spindle can cover full range from 0 to 76 mm

### 3" CLAMPS

Standard machine clamps allows for machining tubes up to 3" with 35 mm positive feed range.

### 35 MM SPINDLE

Heavy duty 35 mm (1-3/8") diameter spindle. The best stability and rigidity available on the market within this machine sizes!

STANDARD WORKING RANGE			OPTIONAL WORKING RANGE		
APPLICATION	FEED STROKE	FEED PER REV.	APPLICATION	FEED STROKE	FEED PER REV.

## PANELMILL PF-E

PanelMill PF can be driven by electric motor. Thus equipped machine covers the same working range but gets much more mobility. We offer two drives with different free speed. Both of them are run by Makita motor and use planetary gear Box's made by KRAIS . It has variable speed control and produce enormous torque. Electric drives are interchangeable with pneumatic one and can be purchased separately at any time.

PanelMill Size	3"	4,5"
Type:	ED600	ED240
Free speed:	220 Rpm	110 Rpm
Power:	1500 W	1500 W
Torque:	360 Nm	420 Nm
Gearbox:	2-stage	3-stage

**OPTIONAL PARTS AND ACCESSORIES**

**4,5" CLAMP**  
The bigger 4,5" clamp to increase PanelMill PF capacity up to 114 mm (4,5"). With this clamp the machine covers tube range from 51 to 114 mm (2-4,5").

**LONG FEED STROKE**  
Special version of clamps and sindle with longer feed stroke. Depending on the application, there is a possibility to build machine with stroke even up to 4". Please consult with factory if you have an application that needs even longer feed.

**BENCH MOUNT PLATE (BMP)**  
PanelMill PF is not the only portable tool for on site applications! Thanks to Bench Mount Plate, it is possible to attach it to the table/worktop. A table base allows you to convert PanelMill-PF to a table machine for bevelling pipes, stubs or elbows. This is only available for 4,5" clamp only.

**TWO VARIANTS**

**RIGHT-ANGLE AND IN-LINE**  
PanellMill-PF is available in two versions: right angle and in-line. Depending on application and preferences you can choose the version, which suits better for your needs. Both models have exactly the same parameters.

**UNIVERSAL CUTTER HEADS**

**PMH-PF-66**  
**66 MM (2,598")**  
Head supplied with PanelMill 3". Designed to fasten wide range of cutting inserts.

**PMH-PF-99**  
**99 MM (3,897")**  
Head supplied with PanelMill 4,5". Designed to fasten wide range of cutting inserts.

**BIT & HOLDERS**  
Universal cutter heads can hold a wide range of holders, with a bunch types of bits.  
→ **TABLE PAGE 71**

**SPECIALIZED CUTTER HEADS**

**PRRMBH-PF**  
Membrane removal and overlay head with carbide bits.  
→ **TABLE PAGE 66**

**CRH-PF**  
Cladding removal head with carbide bits.  
→ **TABLEPAGE 66**

**OBPMH-PF**  
Outside bevelling head (37,5°) for tubes without membranes, with HSS 6% cobalt bits.  
→ **TABLE PAGE 66**

**PANELMILL PF PERFORMANCE**

Facing/beveling application

Membrane removal application on 1" length

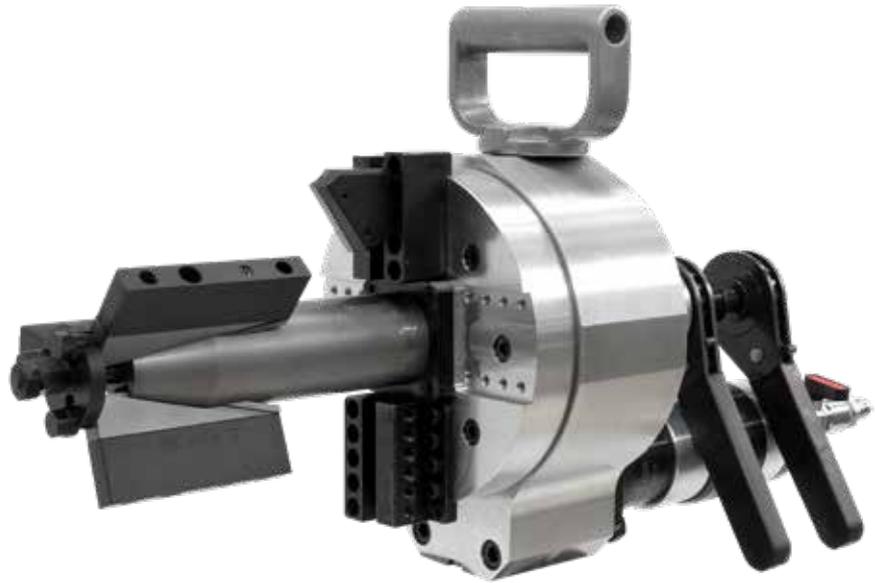

Inconel cladding removal application on 1" length

# SmartMill-7

Most powerful machine within this size range on the market today. Utilizes a powerful 2.2 kW (3 HP) pneumatic motor that is entirely engineered and manufactured by KRAIS. SmartMill-7 has a unique construction that has been specifically designed for the largest end prep systems.

- Self-centering 40 mm (1,57") one piece locking shaft.
- Only one mandrel and 6 Jaw sets needed to cover machines entire range.
- Wide clamps produce superior clamping force for chatter free end preps.
- Fully portable for on-site and Fab-shop work.

SmartMill-7 is available for sale or rent.

STANDARD WORKING RANGE		FEED STROKE	FREE SPEED	POWER	TORQUE

## OPTIONAL ELECTRIC MOTOR UNIT

SmartMill-7E is electric version of SmartMill-7. The machine can cover the same pipe sizes and comes with the same cutting head. The electric motor with 4 speed mechanical gear box has also variable speed control and produce enormous torque on the cutter blade. Is interchangeable with pneumatic drive and can be purchased separately at any time. Take 5 min to replace from pneumatic to electric.

### DUDE-2000-4-SPEED

Motor free speed: 120-210-380-650 RPM  
 Motor power: 2000 Watt  
 Motor torque (on the 1st gear): 240 Nm (180 Ft.Lbs)  
 Machine feed stroke: 50 mm (2")  
 Cutter head speed: 8-14-25-43 rpm  
 Max torque on cutter blade (on the 1st gear): 3600 Nm (2664 Ft.Lbs)

**ADVANTAGES OF MINIMILL-7**

**UNIQUE SHAFT DESIGN**  
40 mm (1,57") shaft, assures rigidity when machining heavy wall pipe. Only 6 set of jaws needed to cover the full locking range.

**POWERFUL MOTOR UNIT**  
SmartMill-7 is powered by powerful and efficient drives dedicated for our Lathe series beveling machines. 39 rpm and 930 Nm (697 Ft.Lbs) torque on the cutter blade is a standard feature.

**HEAVY DUTY HANDLE**  
Machine is equipped with a solid and convenient aluminium handle.

**LIGHTWEIGHT AND PORTABLE**  
The innovative design made it possible to produce lightweight and portable machine. Small weight of SmartMill-7 allows for fatigue-free operation in all conditions.

**OTHER ACCESSORIES**

**RIGHT ANGLE HEAD**  
This right angle head allows for fastening drive in alternate positions. The useful option in tight spaces.

**SMARTMILL-7 PERFORMANCE**

The performance of the machine may vary depending on the skill of the operator, the materials, the conditions of the tools and the air supply system in case of pneumatic unit.

SmartMill-7 is lightweight for its power and capacity and easy to handle by operator.

# PipeMill

PipeMill is a pneumatic powered tube facing, bevelling and weld removal machine. The PipeMill is a rugged, fast and powerful weld end preparation lathe for various pipes including stainless steel and other exotic alloys. A standard machine is equipped with a locking system to cover sizes of 50,8 to 172 mm ID (2.000" to 6.800") with a 250 mm cutting head.

## STANDARD SET UP

### 250 MM (9,8")

Cutter head special for the largest machines. Very rigid. Designed to fasten the wide range of cutting inserts.

STANDARD WORKING RANGE – RECOMMENDED				OPTIONAL WORKING RANGE

## AVAILABLE GEARBOX CONFIGURATIONS

This tool comes with one chosen gearbox as a standard. Torque/speed depends on gear configuration:

GEARBOX 15	15 RPM	2544 Nm	1908 Ft.Lbs
GEARBOX 20	20 RPM	1883 Nm	1415 Ft.Lbs
GEARBOX 28	28 RPM	1290 Nm	969 Ft.Lbs
GEARBOX 37	37 RPM	971 Nm	730 Ft.Lbs

**OPTIONAL HEADS AND CUTTERS**

**290 MM (11,4'')**  
 Biggest head for KRAIS Mini&HyperMill tools. Very rigid. Designed to fasten the wide range of cutting inserts.

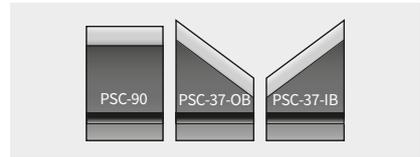

**OB-45-37**  
 Holder for outside tube beveling.

**IB-45-37**  
 Holder for inside tube beveling.

**F-45-90**  
 Holder for tube end facing..

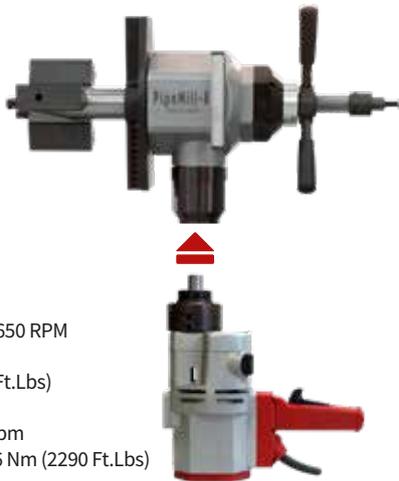

**CUTTERS SET**  
 Cutters made of HSS with 6% cobalt, for use without additional holders.

**PIPEMILL-E – ELECTRIC VERSION**

PipeMill-E is electric version of PipeMill. The machine can cover the same pipe sizes and comes with the same cutting head. The electric motor with 4 speed mechanical gear box has also variable speed control and produce enormous torque on the cutter blade. Is interchangeable with pneumatic drive and can be purchased separately at any time. Take 5 min to replace from pneumatic to electric.

DUDE-2000-4-SPEED

Motor free speed .....	120-210-380-650 RPM

Motor torque (on the 1st gear) .....	240 Nm (180 Ft.Lbs)
Machine feed stroke.....	40 mm (1,6'')
Cutter head speed .....	10-17-30-50 rpm
Max torque on cutter blade (on the 1st gear) .....	3096 Nm (2290 Ft.Lbs)

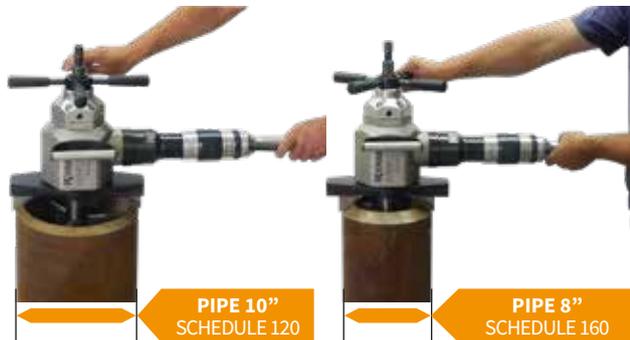

**OTHER**

**SPEED ADJUSTMENT VALVE SAV-500**  
 The solution for all pneumatic drive beveling machines. Allows adjusting cutting speed to suit to the machined tube diameter.

**EXAMPLE TOOL APPLICATION**

# MiniLathe

- Most powerful machine within this size range on the market today. Utilises a powerful 2.2kW (3 HP) pneumatic motor that is entirely engineered and manufactured by KRAIS for the largest end prep systems.
- MiniLathe comes with one of 3 gearboxes as a standard. It gives a wide choice for operator. No need for extra gearbox that reduces the RPM and multiplies the torque - it comes as standard!
- Innovative 6 point locking system assures maximum stability during all machining operations.
- Self-centering 2,75" one piece locking shaft with build in jaws, eliminates the issue of broken or loosening retaining springs and o-rings.
- Only one mandrel and 10 Jaw sets needed to cover machines entire range.
- Wide clamps produce superior clamping force for chatter free end preps.
- Fully portable for on-site and Fab-shop work.
- Available for sale or rent.

**ADVANTAGES OF MINILATHE**

**UNIQUE SHAFT DESIGN**  
70 mm (2,75") shaft, assures rigidity when machining heavy wall pipe. The jaws are fully contained within the shaft with no need for retaining springs or O-rings that easily brake or get lost.

**POWERFUL MOTOR UNIT**  
Powerful and efficient drives dedicated for our Lathe series beveling machines. 11 rpm and 3850 Nm (2840 Ft.Lbs) torque on the cutter blade is a standard feature.

**6 POINTS LOCKING JAWS**  
The innovative, 6 points jaws, effectively lock the machine within the pipe, allowing safe, efficient and smooth processing of the tube end.

**HEAVY DUTY PENDANT**  
Machine is equipped with a heavy duty pendant. This can be attached to both sides of the motor for operator convenience.

**OTHER ACCESSORIES**

**SLIDE BEARING**  
As an option we can supply a bronze slide bearing that delivers more stability and rigidity while machining a very hard materials and heavy wall pipes.

**OPTIONAL MOTOR UNITS**

**DUDE-2000-4-SPEED**  
For thin wall application (up to 1" / 25,4 mm) is an electric motor DUDE-2000-4-SPEED, which offers 4 speed: 120-210-380-650 RPM

**PDE MOTOR**  
The PipeLathe can also be supplied as an electric version, with a 3200 Watt heavy duty motor.

**PDH MOTOR**  
Optional super strong hydraulic motor. Constructed on the basis of a small hydraulic motor and multistage planetary gear box. HyperLathe version generates 11 rpm and up to 8200 Nm (6050 Ft.Lbs) torque on cutter blade at constant cutting speed.

**EXAMPLE TOOL APPLICATION**

In order to facilitate the assembly of the machine in the pipe, the machine optionally can be equipped with a double-sided yoke with removable extensions so that two people can freely install into the processed pipe.

# HyperLathe

- Powerful 3.5 HP pneumatic drive generating 7500 Nm (5,530 ft.lbs) torque on the cutter blade. Variable speed control 0-10 rpm.
- No need for extra gear box that reduces the rpm and multiplies the torque. It comes as standard!
- 4" One piece locking shaft with build in jaws, eliminates the issue of broken or loosening retaining springs and o-rings
- One mandrel covers complete working range.
- Innovative 6 point locking system assures maximum stability during all machining operations.
- Only one mandrel and 10 Jaw sets needed to cover machines entire range.
- Self-centering shaft with build in jaws.
- Wide Clamps produce superior clamping force for chatter free end preps.
- Fully portable for on-site and Fab-shop work.
- Available for sale or rent.

**ADVANTAGES OF HYPERLATHE**

**6 POINT LOCKING JAWS**  
The Innovative, 6 points jaws, effectively lock the machine within the pipe, allowing safe, efficient and smooth processing of the tube end.

**POWERFUL MOTOR UNIT**  
Powerful and efficient drives dedicated for our Lathe series beveling machines. 10 rpm and 7500 Nm (5530 Ft.Lbs) torque on the cutter blade is a standard feature.

**UNIQUE SHAFT DESIGN**  
100 mm (4") shaft, assures rigidity when machining heavy wall pipe. The jaws are fully contained within the shaft with no need for retaining springs or O-rings that easily brake or get lost.

**HEAVY DUTY PENDANT**  
Machine is equipped with a heavy duty pendant. This can be attached to both sides of the motor for operator convenience.

**OPTIONAL MOTOR UNITS**

**PDE MOTOR**  
The PipeLathe can also be supplied as an electric version, with a 3200 Watt heavy duty motor.

**PDH MOTOR**  
Optional super strong hydraulic motor. Constructed on the basis of a small hydraulic motor and multistage planetary gear box. HyperLathe version generates 11 rpm and up to 8200 Nm (6050 Ft.Lbs) torque on cutter blade at constant cutting speed.

**EXAMPLE TOOL APPLICATION**

ID Clamping End Prep Tool 4" I.D. to 19" O.D. 101,4 mm I.D. to 500,0 mm O.D.

Machining pipe 18" schedule 160.

# PipeLathe

- Powerful 3.5 HP pneumatic drive generating 12500 Nm (9259 ft.lbs) torque on the cutter blade. Variable speed control 0-5 rpm.
- No need for extra gear box that reduces the rpm and multiplies the torque. It comes as standard!
- 150 mm (5,9") One piece locking shaft with build in jaws, eliminates the issue of broken or loosening retaining springs and o-rings.
- One mandrel covers complete working range.
- Innovative 6 point locking system assures maximum stability during all machining operations.
- Only one mandrel and 6 Jaw sets needed to cover machines entire range.
- Self-centering shaft with build in jaws.
- Wide Clamps produce superior clamping force for chatter free end preps.
- Fully portable for on-site and Fab-shop work.
- Available for sale or rent.

**ADVANTAGES OF HYPERLATHE**

**HEAVY DUTY DESIGN**  
All the Lathe series machine design is based on long steel spindle which assure maximum rigidity because the locking shaft is fully mounted into that spindle instead partially into the main aluminium body what is causing adverse vibration due to a lot of tension on it.

**POWERFUL MOTOR UNIT**  
Powerful and efficient drive dedicated for our Lathe series beveling machines. 0-5 rpm and 12500 Nm (9219 ft.lbs) torque on the cutter blade is a standard feature.

**6 POINT LOCKING JAWS**  
150 mm (5,9") shaft, assures rigidity when machining heavy wall pipe. The jaws are fully contained within the shaft with no need for retaining springs or O-rings that easily brake or get lost.

**HEAVY DUTY PENDANT**  
Machine is equipped with a heavy duty pendant. This can be attached to both sides of the motor for operator convenience.

**OPTIONAL MOTOR UNITS**

**MOTOR PDE**  
The PipeLathe can also be supplied as an electric version, with a 3200 Watt heavy duty motor.

**MOTOR PDH**  
Optional super strong hydraulic motor. Constructed on the basis of a small hydraulic motor and multistage planetary gear box. PipeLathe version generates 6 rpm and up to 14200 Nm (10475 Ft.Lbs) torque on cutter blade at constant cutting speed.

**EASY CONVERSION TO PIPELATHE 40**

Due to high torque of our PipeLathe hydraulic drive we offer special extension kit for regular PipeLathe machine to increase working range up to 40" OD pipe. See next page for more info.

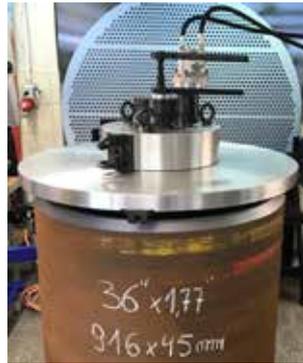

**EXAMPLE TOOL APPLICATION**

PipeLathe is the strongest machine from all KRAIS Lathe tools. It allows for machining tubes up to 24" (600 mm) OD.

# PipeLathe 40

- Powerful hydraulic drive generating 14500 Nm (10800 ft.lbs) torque on the cutter blade. Variable speed control 0-5 rpm.
- No need for extra gear box that reduces the rpm and multiplies the torque. It comes as standard!
- 150 mm (5,9") locking shaft with build in jaws, eliminates the issue of broken or loosening retaining springs and o-rings.
- Innovative 6 point locking system with wide clamps assures maximum stability during machining.
- Only one mandrel and 6 Jaws set covers entire working range.
- Fully portable for on-site and Fab-shop work.
- Available for sale or rent.

# SPECIAL BEVELING

# MiniMill 300FF

A standard machine for Fin Fan cooler tube trimming is equipped with custom head and locking system to suit your application (customer to provide drawing of unit). The MiniMill 300FF cutter heads have 3 carbide inserts with 4 Cutting edges each.

## STANDARD SET UP

## FINFAN ATTACHMENT

Special attachment for facing tubes in fin fan gas coolers. A locking shaft with adjustable length and a support bushing are screwed into the plug thread, making this tool the best one available on the market today. The cycle is approx. 1 min from tube to tube. For this application we recommend our 300 Rpm machine

STANDARD WORKING RANGE		FEED STROKE	FREE SPEED	POWER	TORQUE

**OPTIONAL ATTACHMENT**

**FINFAN SEAL WELD REMOVAL ATTACHMENT**

Simply the best solution for seal weld removal from air coolers. Adjustable length locking shaft and support bushing that fits into the plug thread, making this tool the best one available on the market today. A cycle time of approximately 1 min from tube to tube can be expected.

**EXAMPLE TOOL APPLICATION**

Trimming tubes safely and efficiently. Machine locks securely both to the tube and the plug thread of the water box.

**OTHER OPTIONAL ACCESSORIES**

**SPEED REDUCER**

Easy to use gearbox for 3x speed reduction. Increases the torque, enabling the machine to generate a thick chip whilst reducing the cutting time.

**SPEED ADJUSTMENT VALVE SAV-500**

The solution for all pneumatic drive beveling machines. Allows adjusting cutting speed to suit to the machined tube diameter.

**RATCHET FEED**

Feed system allowing to work in narrow and tight locations, eg. in water walls.

**LEVER FEED**

Quick and easy feed system. Used in many basic applications.

**EXAMPLE TOOL APPLICATION**

Water box demonstration of the simplicity of machine operation.

An operator trimming back tubes prior to seal welding.

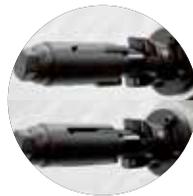

# MiniMill 300GFF

Ideal for gasket seat machining of any size of fin fan cooler. A standard machine is equipped with a cutter head and a special locking system to fit your application. The machine locks directly into the plug thread.

## STANDARD SET UP

**GASKET FINFAN SET**  
Supplied with 20 mm shaft, one set of jaws to suit plug thread diameter, pilot and gasket seat milling head. Plug size details must be provide by customer with order.

Custom machined jaws. Showing locked and up-locked position.

STANDARD WORKING RANGE		FEED STROKE	FREE SPEED	POWER	TORQUE

Other sizes on request. If plug holes are damaged beyond repair, our MiniDrill 55 can be used to upsize them to the next size. Example - 1-1/8" to 1-3/8".

**OTHER OPTIONAL ACCESSORIES**

**FAST CLAMPING SYSTEM**  
System offers rapid tube to tube cycle time, increased productivity (up to 4x) with little operator fatigue. Ideal for large amount of end preps.

**SPEED ADJUSTMENT VALVE SAV-500**  
The solution for all pneumatic drove beveling machines. Allows adjusting cutting speed to suit to the machined tube diameter.

# FinMill

KRAIS FinMill is a air powered tool designed for removing fin from the outside diameter of a tube. The tool is based on the same quality drive and housing as our other PrepMill series tools. Thanks to heavy duty locking system The FinMill fin tube removal tool clamps reliably in the tube and offers chatter-free work at any position.

Reversible motor allow to work and remove left and right hand fins.

## STANDARD SET UP

**DOUBLE SIDE HEAD**  
Special shaped head, allows to remove left- and right-handed fins.

**SHAFT25**  
Self-align, heavy duty locking system. Shafts and jaws are longer and wider to ensure maximum clamping force.

**EXAMPLE TOOL APPLICATION**

Removes 4.0" (101 mm) depth of fin from the tube OD in less than 2 minutes

**OTHER OPTIONAL ACCESSORIES****STAR WHEEL**

The most precise feed system. Used in many basic and demanding applications.

**SPEED ADJUSTMENT****VALVE SAV-500**

The solution for all pneumatic drive beveling machines. Allows adjusting cutting speed to suit to the machined tube diameter.

# MiniDrill

MiniDrill is a unique machining platform designed to safely perform multiple machining operations on heat exchangers, boilers and similar thermal exchange equipment. Designed with operator safety in mind, this system can drill, ream, bore and even re-machine serrations in steam drums quickly and safely. With a 80 mm (3.150") travel, this tool is ideally suited for the majority of plant equipment. The system is fully torque reacted with 2 clamping arms that are independent of one another and can accommodate most pitch configurations. Once locked into the tubes, the MiniDrill is extremely stable.

## AVAILABLE TOOLS WORKING WITH MINIDRILL

**WALL REDUCING**  
Tube wall reducing head with carbide inserts.

**DRILLING**  
Drill for machining holes in tube plugs before removing them with our special plug removal tool.

**REAMMING**  
Safely ream tube sheets.

**BORING HEAD**  
Boring head to machine heavy wall boiler tubes, safely and efficiently prior to collapsing through the drum.

## OTHER AVAILABLE ACCESSORIES

**MINIDRILL WITH FAST CLAMPING**  
MiniDrill with the fast pneumatic clamping system is ideal for manufacturing plants that make large amounts of work on tubes and pipes. It offers rapid tube to tube cycle time, increased productivity with little operator fatigue.

## EXAMPLE TOOL APPLICATION

Reducing tube wall on a 6" thick tube sheet prior to punching.

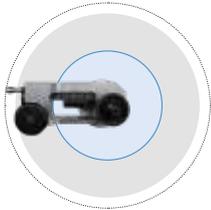

# FLANGE FACING

# MFM – Manual FlangeMill

Basic, simple and cost-effective solution for ID mount flange facing. It is a quick and easy way to reface a damaged flat, grooves in pipe flanges on site. Manual FlangeMill size and body is designed and built to allow quick and convenient processing of small flanges in awkward or dangerous locations.

## TOOL SWING DIAMETERS

FACING RANGE

BODY SWING DIAMETER

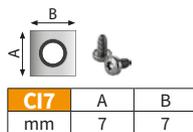

STANDARD WORKING RANGE		MAX V TOOL TRAVEL	MAX H TOOL TRAVEL	BODY SWING DIAMETER		
FACING RANGE	LOCKING RANGE					
30 – 350 mm	25,4 - 254,0 MM	10 MM	55 MM	457,2 MM		
1,750 – 14,000"	1 - 10"	0,395"	2,165"	18"		
DRIVE	BODY WIDTH		BODY HEIGHT		BODY WEIGHT	
Manual	6,5"	165 mm	12,8"	325 mm	19,4 Lbs	8,8 kg

## MFM TOOL BITS AND HOLDER

Manual Flange Mill uses one just type of holders: MFMH-7-L and MFMH-7-R with carbide insert C17 (screw MHS-2,7)

## MFM ADVANTAGES

**PRECISE DEPTH ADJUSTMENT**  
The tool depth can be adjusted (10 mm stroke) thru spindle to define cut depth and the correct finish.

**EASE OF USE**  
The tool arm is rotated by hand using a worm-gear mechanism to provide a perfect spiral finish.

**SMOOTH OPERATION**  
Quick adjustment handle to move the cutter to groove position

**MACHINING IN EVERY POSITION**  
Manual FlangeMill can be freely rotated to work in every position. Remachining damaged flat, grooves and raised faced flanges on site is possible in every position.

## EXAMPLE TOOL APPLICATION

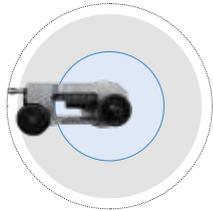

# MFML – Manual FlangeMill, long

Long version of simple and cost-effective solution for ID mount flange facing. It is a quick and easy way to reface a damaged flat, grooves in pipe flanges on site. The L(ong) version FlangeMill size and body is designed and built to allow quick and convenient processing of mid sized flanges in awkward or dangerous locations.

## TOOL SWING DIAMETERS

**SMOOTH OPERATION**  
Quick adjustment handle to move the cutter to groove position

**MACHINING IN EVERY POSITION**  
Manual FlangeMill can be freely rotated to work in every position. Remachining damaged flat, grooves and raised faced flanges on site is possible in every position.

# FlangeMill

FlangeMill is ID mount flange facing machines. It is a quick and easy way to re-machine damaged flat and raised faced flanges on site. The machine comes factory configured. FlangeMill is designed and built on the basis of the HyperMill-55.

STANDARD WORKING RANGE		FEED STROKE	FEED SPEED	FREE SPEED	POWER	TORQUE	
APPLICATION RANGE (ID-OD)	SURFACE FINISH						
44 – 356 mm	63 to 250 RMS	38 MM	0,15 MM/PIN	55 Rpm	1,7 HP	280 Nm	
1,750 – 14,000"		1,500"	0,005"/PIN			210 Ft.Lbs	
AIR USE		BODY WIDTH		BODY HEIGHT		BODY WEIGHT	
55 cfm	1,3 m³/min	2,32"	59 mm	13,1"	335 mm	30,6 Lbs	13,9 kg

## MACHINING IN EVERY POSITION

FlangeMill can be rotated under any angle. Machine can be used for machining flanges in every position.

## ELECTRIC VERSION: FLANGEMILL-E

## ACCURATE LOCKING SYSTEM

Both version of FlangeMill uses the same internal locking system for safety and better accuracy.

FlangeMill-E is electric version of regular FlangeMill. An electric machine cover the same working range and can be delivered with the same configuration. The electric motor made by Makita with 3 stage planetary gear box made by KRAIS has variable speed control and produce enormous torque. Is interchangeable with pneumatic drive and can be purchased separately at any time.

- Free Speed ..... 115 RPM
- Power ..... 1,1 Hp
- Torque ..... 366 NM (280 Ft.Lbs)
- Feed Stroke ..... 38 mm (0,787")

# IMFM-24 Internal Mounted FlangeMill

Internally mounted, lightweight and durable machine tool. Ideal for machining all types of flange faces, seal grooves, weld preparations and counterbores.

**Features:**

- Heavy-duty steel/aluminium design
- High rigidity of the machine in relation to the dimension and weight
- Solid but lightweight construction
- Continuous groove facing feeds
- Swivel tool post for grooves, RTJ flanges and bevels
- Easy levelling and centering system with built-in fast centre feature
- Quick clamping with solid, 50 mm self-centering steel shaft
- CE certificate

As standard IMFM is supplied with the complete toolkit, including cutting tool and inserts, air filter with lubricator and hose connection, required jaws to cover the full range, paper manual and storage/shipping box.

Beside standard pneumatic 2,2 Hp drive, for IMFM we offer a wide choice of pneumatic and electric drives.

**Bigger sizes (IMFM-32 and IMFM-60) coming soon!**

STANDARD WORKING RANGE		FACING FEEDS			FREE SPEED	POWER	
FACING DIAMETER	CLAMPING DIAMETER	1,75 MM SCREW	1,25 MM SCREW	1,00 MM SCREW			
63 – 610 mm	57 - 508 mm	0,2 / 0,8 mm	0,14 / 0,57 mm	0,15 / 0,45 mm	20 - 42 Rpm	2,2 Hp

AIR USE		BODY WIDTH		BODY HEIGHT		BODY WEIGHT	
75 cfm	2,2 m <sup>3</sup> /min	Depends on motor configuration, see drawing below		99 Lbs	45 kg		

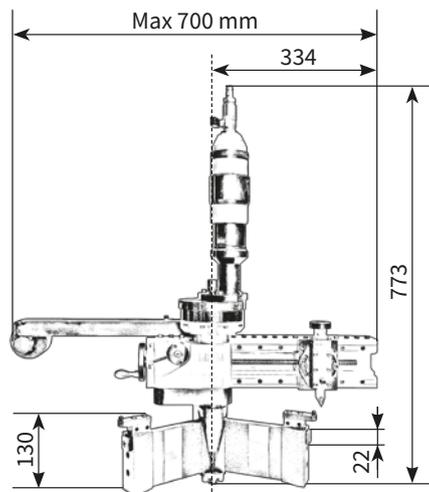

**LEVELLING AND CENTERING**

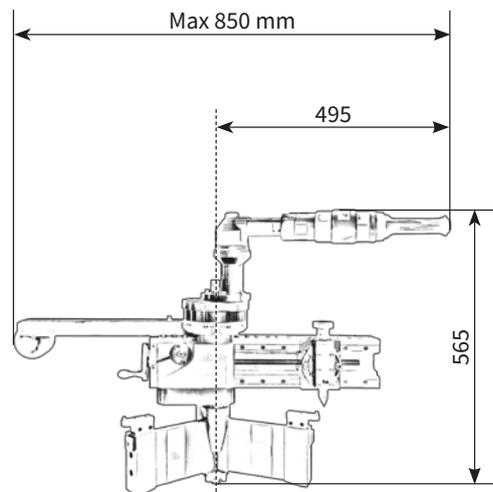

Special jaw set for easy and quick levelling and centering machines on the flange

**DIMENSIONS**

**INLINE VERSION**

**RIGHTANGLE VERSION**

# SFFM Flange Facer

SFFM series Flange Facing Machines are mounted on the outer diameter of the flange. The precise, synchronized radial and axial feed mechanism allows for a high quality machining, resulting in one continuous groove producing a true gramophone finish.

SFFM Flange Facing Machines are suitable for various flange types:

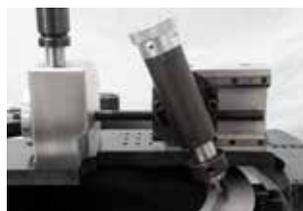

- Flat Face
- Raised Face
- Ring Type Joints (RTJ)
- Tongue & Groove
- Lens Ring
- Grayloc® (hub profile)
- Compact Flanges

SFFM Flange Facers are suitable for the oil and gas industry, power plants, chemical plants, oil rigs and many others. They are prepared to implement applications complying with ASME standards.

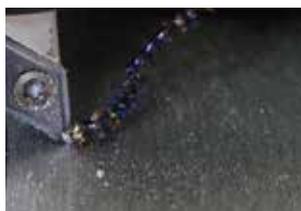

MODEL	WORKING RANGE			DIMENSIONS					WEIGHT	JAWS

## FEATURES OF MACHINE

### CUTTING GROOVES

The machine offers a simple way of execution of the RTJ grooves by using the single point swivel head or formed tools

### GRAMOPHONE GROOVE

The design of the feed attachment assures the automatic and variable feed rate on radial axe producing proper gramophone groove.

### STRONG DRIVES

Machine can be driven with a wide range of motors, pneumatic, hydraulic and electrical, including servo drives - all made by KRAIS.

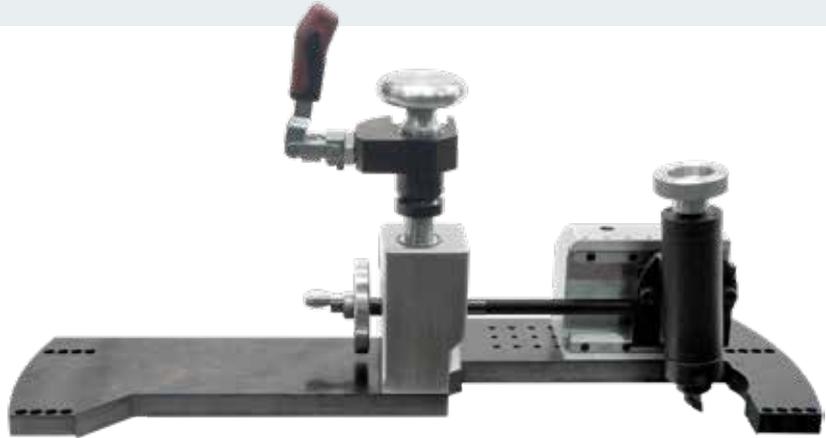

### AVAILABLE AS MODULE

For owners of our regular SFSF machines we offer special module, allowing to convert the standard SFSF into regular flange facing module

# SFFM Module

SFFM Module can be mounted on all our SFSF clamshells and convert the regular Clamshell into OD mount flange facing machine. SFSF clamshell combined with the module widen the scope of its application and still providing the same functionality as the machine SFFM. Purchasing the SFFM Module allows to save a lot of money by avoiding the purchase of two separate machine tools. Time needed for the machine changeover is only 20 minutes.

## SURFACE FINISH

The Modul is equipped as standard with feed gearbox in order to generate both, fine or coarse surface finish by simple switch on the gear box.

# SPLIT FRAME CLAMSHELLS

# SlimFit Split Frame Clamshells

KRAIS SFSF portable SLIM FIT Clamshell series are designed for strength and easy handling. Each of the machine from the SFSF series have a height of 3,248" (82,5 mm) up 24" and 4,47" (113,7 mm) up to 48" and a width of 2.5" (63,5 mm) resulting narrow body low profile design that makes the SFSF series the ideal choice in tight spaces .

- 15 Standard models cover a range from 1." (33,4 mm) to 48" (1219 mm) OD
- Pneumatic, hydraulic and electric drive options are available .
- Motor mount on keyways to prevent the motor to twist and potential damage on gear ring .
- Several different drive options are available to best position the motor for a specific machining application
- All pneumatic and electric motors are design and Manufactured by KRAIS after 20 years experience of manufacturing pneumatic drives for boiler and heat exchangers tube rolling motors.
- SFSF series clamshells can be equipped a wide range of accessories to increase performance and expand capabilities.
- Adjustable locator pads minimize the number of locators.

## TOOL HOLDER

Choice of 3 positions with different travel length tool holder with heat treated slights.

## TRIPPER MODULE

Lever type tripper module for operator safety.

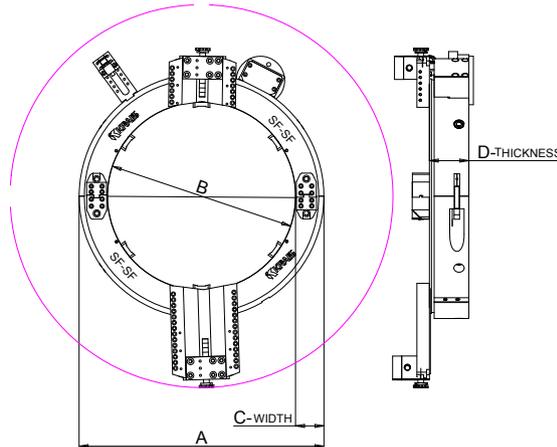

## QUALITY MATERIALS

Steel plates on the back part for machine squaring on the pipe .

General technical machine information to enable to make the right choice to suit your application.

For our SFSF clamshells we offer a wide range of pneumatic , electric made 100% in house and hydraulic choose by our engineers or upon customer preference . Such a big range and variety of parameters allow us to select motor to achieve to best and most post suitable cutting speed to machined pipe material and diameter.

## RECOMMENDATION - ELECTRIC MOTORS

**First choice electric drive:** PDEC-3200 - high-torque motor with built-in controller for precise speed control. Similar to servo motors, this drive does not slow down and does not tighten under load, but generates up to 5 times more torque than a servo motor which translates into high machining stability. Offers additionally a bunch of indicators: for overload, overheating and brush worn.

# Reaction ring for SFSF clamshells

**KRAIS SFSF REACTION RING IS PATENT PENDING! ALL RIGHTS RESERVED**

For super heavy applications with super heavy wall and/or hard alloy pipes, consider our ORR to enhance axial and linear stability.

We manufacture the ORR steel ring, which mounts on the rear of the aluminium ring. The ORR is also equipped with 4 steel location stabilizers to enhance the range and rigidity of the machine for those heavy duty applications. The ORR dramatically increases the axial stability and rigidity when cutting and/or bevelling. This solution can help to save time and expense for clamshells completely made out of steel – ask your representative for more details.

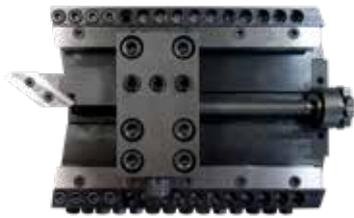

SFSF-1624 with ORR mounted on the 24" pipe schedule 120.

ORR mounted on the rear on the existing threaded holes in the aluminium ring.

# SFSF clamshells add-ons

## TOOL SLIDES

KRAIS Tool Slides are rugged and built for strength and durability tool slides. Standard sizes are 1", 3" and 6". Other on request. Out-of-round and axial-feed tool slides are also available. Built with the same quality: for strength and durability as other KRAIS tool slides. KRAIS Slide construction dramatically eases tool slide mounting and locating.

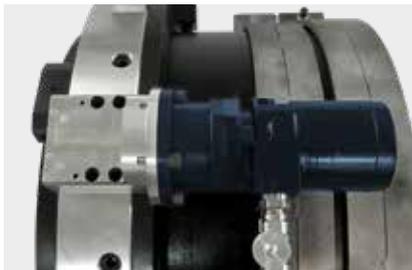

## BCS - BRIDGE CROSS SLIDES

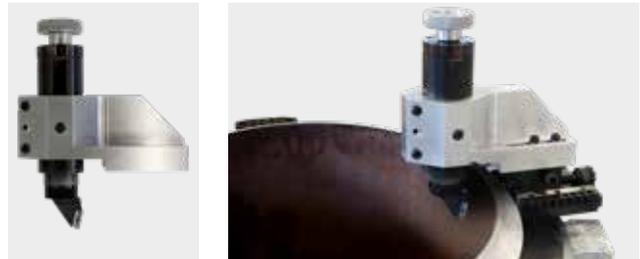

Bridge Cross Slides are available for all KRAIS Split Frame SlimFit series machines. Whether flange facing or single point heavy wall machining, the BCS quickly and easily bolts onto the split frame ring.

## HYDRAULIC MOTOR

## SFSF-CBA UNIVERSAL COUNTERBORE ATTACHMENT

Designed for the precision counterboring of tube and pipe inside diameters. The Universal counterbore is manufactured with both 6" (SFSF-CBA-150) and 10" (SFSF-CBA-254) long sleeves, and attaches directly to all KRAIS Split Frame SlimFit clamshells. The Universal Counterbore Attachment utilizes a simple and effective hand wheel to precisely control the counterboring process. Both versions (6" and 10") can be mounted directly to the tool slide or Bridge Cross Slide.

## SFSF-SCBA SWIVEL HEAD COUNTERBORING ATTACHMENT

Designed for the precision counterboring of tube and pipe inside diameters. The swivel head attachment can also be used for flange facing, OD beveling and flange facing grooving. The Swivel counterbore is manufactured with both 6" (SFSF-SCBA-150) and 10" (SFSF-SCBA-254) long sleeves, and attaches directly to all KRAIS Split Frame SlimFit clamshells. The Universal Counterbore Attachment utilizes a simple and effective hand wheel to precisely control the counterboring process. Both versions (6" and 10") can be mounted directly to the tool slide or Bridge Cross Slide.

## OUT OF ROUND TOOL SLIDES

Out of round tool slides - can be solution for all misshapen tubes and pipes. Out of round slides feature durable springs and tracking module that follows the contours of a deformed or less than perfectly round pipe. Built with the same quality: for strength and durability as other KRAIS tool slides.

# SFSF clamshells bits and holders

## INSERTS FOR CLAMSHELLS

Inserts are made out of High Speed Steel with 6% Cobalt and are available with ALNOVE hard coating also.

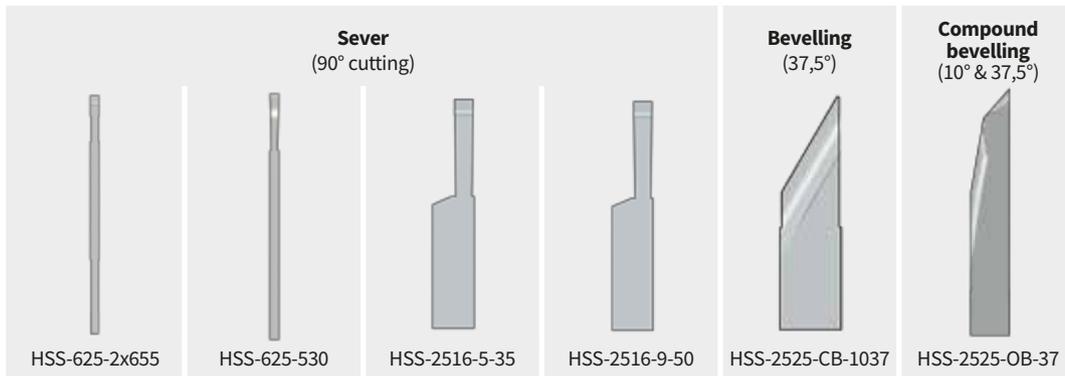

For other tool bits please send your request.

**CUTTERS FOR CLAMSHELLS**

HSS tooling is also available in both **TiNi** and **ALNOVE coatings** (please consult factory for details).

# ACCESSORIES

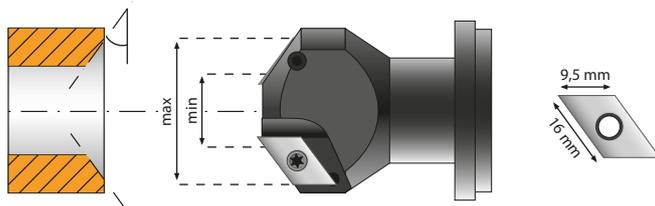

# 60 Special Heads for MiniMill

## STWRMH

STRENGTH WELD REMOVAL  
BIT: HSS 6% Cobalt  
DEGREE: 37.5°

Custom designed head dedicated for strength weld removal. The heads are sized per tube diameter and are precisely engineered so that the inserts cannot damage the shaft or locking jaws. Simple, trouble-free set up makes these heads very advantageous.

# Special Heads for PrepMill/HyperMill

## OBPM

OUTSIDE BEVEL MILLING HEAD  
BIT: HSS 6% Cobalt  
DEGREE: 37,5°

Custom, precisely designed head. Dedicated for the outside beveling of both tubes and pipes. Sized per tube or pipe diameter and angle of required weld bevel. The heads are precisely engineered so that the inserts cannot damage the shaft or locking jaws.

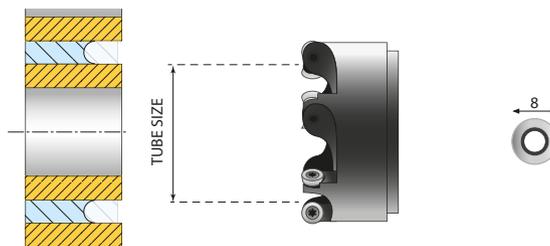

HEAD NR	TUBE CAPACITY			RANGE [INCH]		RANGE [MM]		INSERT	NO. OF INSERTS	SHAFT

**STWRPM**

STRENGTH WELD REMOVAL  
BIT: HSS 6% Cobalt  
DEGREE: 37.5°

Custom designed head dedi-  
cated for strength weld removal.  
The heads are sized per tube  
diameter and are precisely  
engineered so that the inserts  
cannot damage the shaft or  
locking jaws. Simple, trouble-free  
set up makes these heads very  
advantageous.
