

Gallagher T15 Reader

The T15 contactless reader is available in a range of options, providing a robust security solution able to withstand the toughest site conditions.

Gallagher T15 Reader

The robust construction of Gallagher's T15 Reader makes it perfect for deployment in environmentally challenging locations. Our comprehensive testing procedures prove the T15 delivers outstanding all-weather performance, making it the easy choice for outdoor use.

Environmentally resistant

The latest in thermoset potting technology is used in the construction of this reader, making it the undisputed first choice for your outdoor applications. Accordingly, the reader has attained an IP68 rating, reflecting its exceptional performance in challenging conditions.

Slim form

The reduced footprint of the T15 allows the use of multi-technology reader options in locations that have minimal available space, like mullions.

Flexible surface application

Delivering improved performance on a variety of surfaces, the T15 can be installed without the need for a spacer (even on metal).

Decor options

Available in black or white, and with a variety of optional accessories, this reader will fit seamlessly into your site's aesthetic scheme.

Robust construction

With an IK07 impact rating, the T15 continues Gallagher's T-Series readers legacy of tough, reliable security products.

Trusted technology

The T15 joins an established collection of Gallagher readers, utilizing both tried and tested features, and the newest in technology developments. NXP's high performance multi protocol integrated circuit for MIFARE communications, and Bluetooth® wireless technology are just some of the enhancements.
