

Ribbon blender

Introduction

WLDH ribbon blender is widely used in chemical, pharmaceuticals, food, and construction line. It can be used to mix powder with powder, powder with liquid, and powder with granule. Under the driven of motor, the double ribbon agitator mix the material quickly. This ribbon mixer is characterized by high mixing effect, large productivity, and a very low failure rate.

Working principle:

Horizontal ribbon mixer is mainly combined with mixing barrel, agitator, driven unit. Untwist double ribbon are swirled with the main shaft in the U shape barrel. The outer ribbon push the material from the two ends to the centre, inner ribbon push the material from center to the two

ends. Thus to achieve material convention

The discharging port is set in the bottom centre, with the help of the outer ribbon, the material can be discharged completely, and no dead zone.

Main Parameters

Name	Ribbon blender	Ribbon blender
Model	WLDH-500	WLDH-1000
Total volume(L)	500L	1000L
Capacity(KG/time)	200-300KG	400-600KG
Mixing time(min)	8-10min	5-10min
Speed(r/min)	35 r/min	33 r/min
Power(KW)	5.5Kw	11Kw
Weight(KG)	650Kg	1800Kg
Dimension(mm)	L2200xW780xH1680mm	L2800xW920xH1800mm
