

IGNITE 2000 - Induction Cap Sealing – Automatic MS304

Machine

This machine gives complete flexibility allowing for the sealing of 20mm through to 120mm diameter caps without any change parts and can be wheeled easily from line to line with full tool-free adjustment for head height and leveling. IGNITE 2000 is an all in one compact mobile induction sealing system featuring the latest logic control cards and smooth power regulation R.Technologies also manufacture custom built sealing heads and 'tunnel Head' for particular applications , unusual closure designs, and high speed sealing.

Technical Specification

Supplies	1 Phase, 200-240VAC 50Hz, 2.5Kw
Cap size	20-120mm
Max. line speed	50feet/min
MOC	AL/MS
Dimension	L.760*W.600*H.1670mm
Net Weight / Packaged Weight	100kg/170kg
