

## Tea Roasting Machine

### Machine Picture

### Application

This product is suitable for the frying or drying of various teas. It is also suitable for frying and drying of shelled fruits such as melon seeds and peanuts.

### Advantage

- 1.It adopts automatic constant temperature system, and is equipped with manual ignition device and automatic ignition system, which is convenient and quick.
- 2.The use of special insulation materials, better prevent the heat from escaping, rapid temperature rise, thus achieving the purpose of saving gas.
- 3.The rotating structure of the drum adopts the advanced stepless speed regulation mode, which is easy to operate, stable in operation, quick in discharging and free from residue.
- 4.The use of stainless steel gas row, with uniform heating, high thermal efficiency and so on.

### Parameters

<b>Model</b>	<b>: GE-70</b>
<b>Dimensions</b>	<b>: 980×1565× 1630 mm</b>
<b>Voltage</b>	<b>: 220V/50Hz</b>
<b>Drum inner diameter</b>	<b>: 700mm</b>
<b>Drum inner length</b>	<b>: 100 mm</b>
<b>Drive motor Power</b>	<b>: 0.75KW</b>
<b>Speed</b>	<b>: 1390 rpm</b>
<b>Voltage</b>	<b>: 220 V</b>
<b>Exhaust fan Power</b>	<b>: 85 W</b>
<b>Speed</b>	<b>: 2200 rpm</b>
<b>Voltage</b>	<b>: 220 V</b>
<b>Drum speed</b>	<b>: 5-37 rpm</b>
<b>Heating type</b>	<b>: Liquid gas</b>
<b>Efficiency</b>	<b>: 45 kg/h</b>
