3. Installation done.

Install the Device

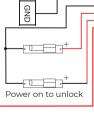

#### Important Notice

#### 4. Power Over Ethernet Supply

### 5. VF30 Pro & Anviz SC011

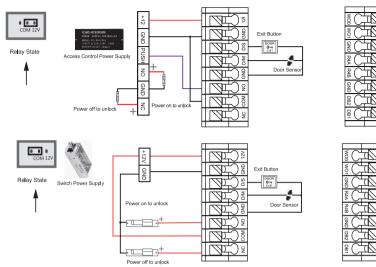

SC011 only accepts encrypted wiegand signal by Anviz to ensure the high security level. Check https://www.anviz.com/products/sc011-access-controller.html for more SC011 information. Switch Power Supply 

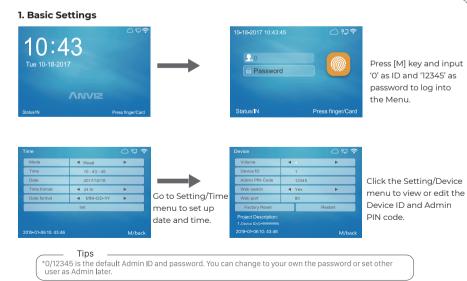

### 6. VF30 Pro & Access Control Power Supply

Please follow the guick guide wiring diagram. Damaged products due to the improper wiring are not covered by product warranty.

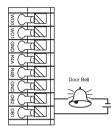

Power Over Ethernet provides network communication, and the power supplied is sufficient. It works for both devices and lock. When using PoE, total load should not exceed 12.95W. Overload power supply may cause damage to device.

### 7. Operation Guide

Door Bell

# 8-2017 10:43:45 Go to 'User' - 'Add' menu. Fill the User ID and press 'OK' move to next bar to fill the user info.

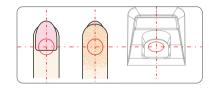

2. Add Users

Dept d hgtrs 🕨 🔿 Mode

Swipe the card at card sensor area to let the device read the card number. Then move to 'Enroll FP' section, and click [OK] button.

Correct Method:

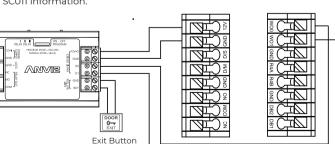

Place finger in the center of the sensor.

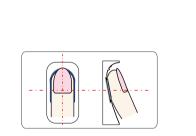

Finger is not placed on the center of the sensor.

- 2 -

Exit Button

Place finger flatly and smoothly on the sensor.

Finger placed inclined.

Use fingertip.

#### 2. Ethernet Settings

#### 4. Character Input Method

\* Use the left[<] / right[>] button to move the cursor to the area you want to edit.

\* Press the [Fn] button to active the character input mode. You will see "Aa" at the bottom of the screen. \* Use left[<] and right [>] button to switch between "Aa", "123", "!?" and "Picture", you can select different option to enter letters, numbers, or special characters,

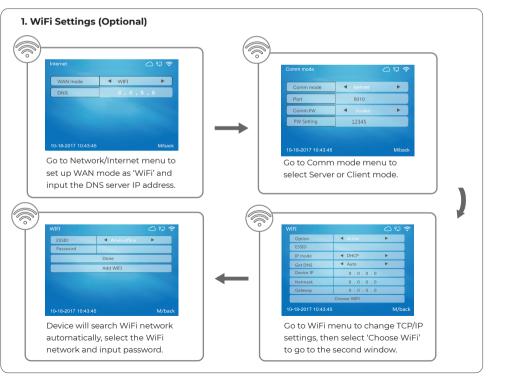

#### 8. Communication Setting

\* Enter to the Network menu, and Ethernet to adjust Ethernet settings.

\* Switch to 'Network' -> 'Comm Mode', to change client or server mode by your needs.

\* Adjust IP address on management computer. For instance, device IP address is 192.168.0.218, then make sure the management computer IP address as 192.168.0.xxx (xxx can be any numbers, but different than 218). \* When the device has WiFi function, it is suggested that the device is installed as far away from the metal

parts as possible. The distance between the installation location of the device with WiFi function and the router should be within 30m.
