

ELECTRIC GREASE MACHINE (with 2 batteries inside)

1. Product Introduction

This product 24V electric grease machine, easy to operate, saves time and energy, no more wasted grease, to ensure that the oil is not polluted, this product uses all kinds of heavy equipment standing 24V starting battery for power, direct use of finished product oil barrels, no need to move grease to the special barrel, as long as the finished product grease barrel cover is removed, the product can be placed on the grease surface of the finished grease barrel. Transmission pressure (0-40MPa) adaptive. This Product has obtained national invention patents and utility model patents.

2. The Structure of Product

4. Specification of Product

Product Series	Working Pressure (mpa)	Maximum oil delivery speed (MAX g/min)	Oil delivery speed (g/min)	Oil storage capacity (kg)	Control method	Power supply voltage (V)	Motor input power (VA)	Total Weight (kg)
DC-801	0-40	350	350	Barrel 12-18	Pressure control	DC24	95	8.5
