

Water Sanitary System

Serius Water

Mixed-type soft-acid hypochlorous acid water generation

Features

High sterilization ability

Hypochlorous acid that is principal component of sterilization is utilized effectively by soft-acid pH value.
Reducing of number of bacteria (effect to spore bearing) •Shortening of sterilization time

Relief and safe

Concentration is stable by auto dilution system.
Safety of Serius soft water and mechanical safety
Improvement of work environment, reducing of environmental loading, Auto dilution system

Low cost

Reducing of chlorine concentration, shortening of sterilization time
It eliminates the need for time to dilute and check the concentration by loading the auto dilution system.

Application examples

- Cooking process (Processing, cooking, hygiene management)
- Washing and sterilization of cooking tools
- Meat Slaughterhouse
- Hygiene management of stock raising market
- Laboratory animal facility
- Medical, Fire station (ambulance)
