

Pile Presser / Tofu Pressing Machine

—Vertical Press Machine—

Characteristics

- 1.Small Installation Space
- 2.Ideal pressing possible with gradual pressing of selfweight.
- 3.It won't make mold cool down. Keep the quality of Tofu.
- 4.It can get good tension Tofu as it does not press compulsory like just putting heavy weight at one time.
- 5.Less mold needed
- 6.Possible to reduce the man powder of coagulating and pressing by connecting conveyor.

Specification

Machine Size(mm)	1,500 × 1,000 × 2,700mm
Machine weight (kg)	300kg
Voltage power consumption	200V 3 phase 0.9kW
Number of Piling mold	10-12 pile

Option

Bog & Small Mold changeable	2 different size of the mold is usable(Wide sholf be same size.)
Front/Back auto releasing	Automatically start piling after setting the mold on the position without pushing the button.
Weight Box	By adding weight box, you can increase the pressure.
