

For removal and eradication of viruses and bacteria

ウイルス・細菌の 除去・除菌に 衛生高除菌水

High sterilization power and safety
Excellent hypochlorous acid water,
At low cost

Less rough hands (Tap water level)
It is weakly acidic, so there is little roughening of hands and rough skin, and hand washing is possible frequently

Deodorizing effect
Deodorizes putrefaction odor and prevents odors around

Can be used as washing water
• Please note that there is a bleaching effect (clothing, etc.)

Functional water evolved for sterilization.
Weakly acidic hypochlorous acid aqueous solution (Sterilized water)

ご家庭・携帯用に

■ 手指の除菌に。

Disinfection of hand & fingers

ポケット クリン・テ

POCKET CLEAN-TE

EMPOWERED BY WHITE FACTOR 50ml

● Spray about 0.1ml (1 push) at a time.

Precautions for use

- Do not mix with others.
- Because quality deteriorates, we recommend early use.
- Avoid direct sunlight and high temperature, please keep in a cool and dark place. There is a risk of quality deterioration.
- If symptoms such as dermatitis or eczema appear, discontinue use and consult a doctor.
- Should this get in your eyes, rinse immediately with tap water for at least 15 minutes, and get medical attention immediately.
- If swallowed accidentally, drink 1-2 cups of water or milk and get medical treatment immediately.
- Because the liquid is chlorine-based, it corrodes and bleaches, so be careful when using it.

DANGER: When mixed with acidic products, toxic chlorine gas is evolved.

Notes and intended use

Weakly acidic hypochlorous acid aqueous solution

DANGER: When mixed with acidic products, toxic chlorine gas is evolved.
