## COMBI MOP WHEEL

### A Softer Approach to Finer Finishing

Although the best tool to use when it comes to sanding down and polishing a surface is the standard SK Abrasives Mop Wheel, our Combi Mop Wheel with its interleaving layers of softer abrasive materials further enhances the task for finer surface polishing.

The SK Abrasives Combi Mop Wheel is made up of soft abrasive grains interleaved with sand paper to create a double abrasion and polishing action on the surface to be worked on. Our Combi Mop Wheel is available in a choice of 4 abrasive surfaces; Coarse (CRS), Medium (Med), Fine (Fin) and Very Fine (VFN)

#### Recommended Usage & Application

SK Abrasives Combi Mop Wheels are used for de-burring and creating a satin finish on hard metal surfaces such as stainless steel and also as a follow-up process to improving the finishing of a surface after the utilization of conventional abrasive wheels.

SK Abrasives COMBI MOP WHEEL

Stock Code	Description	Grade	MOS
SKCMB-40256CRS	SK Combi MOP Wheel 40mmX25mmX6mm	CRS	15,000RPM
SKCMB-40256MED	SK Combi MOP Wheel 40mmX25mmX6mm	MED	15,000RPM
SKCMB-40256FIN	SK Combi MOP Wheel 40mmX25mmX6mm	FIN	15,000RPM
SKCMB-40256VFN	SK Combi MOP Wheel 40mmX25mmX6mm	VFN	15,000RPM
