

The single solution for drum handling safety, mobile dispensing capability, and built-in spill containment!

The EcoPolyBlend™ Spill Containment Caddy offers you convenient handling and dispensing of hazardous chemicals. Portable unit with wheels transports drum easily – allows one person to move and dispense a full drum. Ergonomic design with tilt/stop feature minimises back strain. Two tension straps hold one 200 litre drum securely in place. 250 litre spill sump contains chemical spills, eliminating hazards and hassles. Exclusive “open-view” sump design makes clean-up simple and quick. 100% recycled polyethylene construction provides maximum corrosion resistance and leakproof protection, assuring a long lifetime of service. Black colour hides dirt.

Description	Sump Cap. (Litres)	Load Bearing Capacity	External Dim. W x D x H	Black Model No	WHS	Delvr Wt (kg)
Indoor/Outdoor caddy	250	567 kg	813 x 1829 x 660 mm	28665	A,E	57.0

An eco-friendly, cost-effective way to collect liquids and keep drum tops clean.

EcoPolyBlend™ Polyethylene Spill Control Funnels fit all closed-head 110 and 200 litre drums. Low profile, wide diameter opening offers large “target” for quick, easy pouring. Scalloped, sloped design minimises splash and prevents containers from resting in their own liquids. Large, flat well at the throat of funnel allows for passive draining of paint tins, filters, buckets and other containers. Funnel for flammables includes a drum fill vent with brass flame arrester, threaded bung cap with tight seal, and pressure relief valve for high temperatures. Moulded-in hook stores optional funnel cover.

Environmental Products FOR SPILL CONTAINMENT

Approved for the transportation of hazardous materials

Dual purpose drum is DOT/UN approved for use as a salvage drum for dry hazardous materials or can be used as an overpack as secondary containment with a 360 litre sump capacity for DOT/UN approved drums carrying solid or liquid material. Durable 100% polyethylene construction is chemical and weather resistant to withstand the rigors of land, air, and sea transportation. Twist-on threaded lid makes closure safe and easy with no troublesome metal band needed. Relocation is simple via forklift from any one of three positions. Units nest when empty for compact storage.

- Rugged yellow polyethylene DOT/UN certified as a salvage drum to the highest "X" rating for Packing Groups I, II, III solids up to 340 litres
- EcoPolyBlend™ black style offers a green choice made from durable, 100% recycled polyethylene is DOT/UN certified as a salvage drum to a "Y" rating for packing groups II and III solids up to 300 litres

www.justritemfg.com

Eco-friendly modules made of 100% recycled polyethylene combine efficient drum storage and positive spill control.

The EcoPolyBlend™ Drum Management System organises drum storage for maximum efficiency, productivity and cost-savings. Space-saving, stackable design stores up to four 110 and/or 200 litre drums of Class 1B or 1C flammables and combustibles or non-hazardous liquids. 100% recycled moulded polyethylene construction provides maximum chemical resistance – preventing corrosion, deterioration, leaks, and assuring a long lifetime of service. Moulded-in drum lock-channels hold drums in place. The system consists of three parts: a base module, stack module and dispensing shelf.

The Base Module is the key component of the system. It is designed to hold two drums with a 1388 kg total load capacity. With base empty, forklift channels facilitate easy relocation within the plant. The system's generous 250 litre "open-view" spill containment sump is located in the base module. Spills or tiny drips of hazardous chemicals are easy to spot and quickly clean up with this wide-open design.

The Stack Module doubles system capacity, holding two additional drums for a total combined load of 680 kg. When storing both 110 and 200 litre drums, the smaller drums should be placed on top in this stack module.

The Dispensing Shelf has a load capacity of 27 kg, and mounts securely to the stack module for convenient dispensing from the upper level.

Safety Cabinets

Justrite Safety Storage Cabinets offer top performance for flammable liquid storage and protection.

Sure-Grip® EX

Fusible links hold doors wide open and melt at 74°C for automatic closure (on self-closing models).

Sturdy 1 mm double wall steel with 38 mm of insulating air space.

Easy-close, self-latching doors; handle does not require manual rotation to engage mandatory three-point latch for protection under fire conditions.

Fully welded, not riveted, construction holds squareness for longer life, offering greater protection in a fire since air gaps are reduced.

Continuous piano hinge provides smooth closure.

Durable and chemical-resistant, lead-free powder-coat paint finish, inside and out, retains high gloss look and minimises the effects of corrosion and humidity.

Dual vents with built-in flash-arresters strategically placed at bottom and opposite top.

Hybrid finish of epoxy and polyester offers both chemical resistance and UV protection

Self-indexing doors guarantee they will close in sequence and assure a tight closure from top to bottom (on self-closing models).

Patented SpillSlope™ safety shelves safely direct incidental spills to back and bottom of leak proof sump. Adjustable on 76 mm centers, they meet ANSI standards with a 159 kg safe allowable load.

Welded shelf hangers interlock with shelf to offer maximum "non-slip" stability with no flimsy brackets to lose.

Keyed, three-point latch safely secures contents.

Built-in earthing connector (on outside side panel) for easy earthing.

51 mm liquid-tight containment sump (with up to a 19 litre capacity on 170 litre models) holds leaks and meets US EPA requirements.

Complies with US OSHA 29 CFR 1910.106 and NFPA Code 30, section 4.3.3; FM Approved

Adjustable, levelling feet for balancing on uneven surfaces.

On self-closing models, concealed self-closing mechanism provides obstruction-free access to top shelf space. UFC compliant.

U-Loc™ handle includes double key set or can be padlocked for greater security. Double key set included for security. Padlock not included.

HazAlert™ reflective labeling for high visibility under fire conditions "FLAMMABLE – KEEP FIRE AWAY" trilingual warning label in English/Spanish/French.

Chemical Characteristics and Capacity Issues

Size and type of container being stored:

Determine if you are storing safety cans, 110 and 200 litre drums, smaller paint tins, 4 litre bottles, aerosols, dispenser cans or other similar containers.

Capacity needs:

Speciality cabinets are available for on-the-spot needs while larger cabinets offer expanded or large-quantity storage.

Type of chemical to be stored:

Using colour and labelling in your storage practices helps identify, organise and segregate liquids.

Always store chemicals in closed containers. Clean up spills promptly. Locate cabinets in well ventilated and low humidity environments.

	Yellow for flammable liquids
	White or Grey for flammable liquids
	Red for combustible liquids
	Blue for corrosive liquids
	Green for pesticides and insecticides

Convenience, Protection and Compliance Factors

Door style preference:

Door style is usually chosen by preference.

Cabinets with self-closing and self-latching doors provide an extra measure of protection.

Manual

Economical manual-close doors permit doors to open a full 180 degrees. When pushed closed they will automatically self-latch.

Self-Close

This style self-indexes, self-latches and self-closes to automatically shut doors upon release. Mechanism is concealed in the top wall, maximising available shelf space. Fusible links hold doors open during use. In the event of a fire, fusible links will melt at 74°C to automatically close doors.

Sure-Grip® U-Loc™ Handle

Attractive, self-latching padlockable handle offers easy fingertip access to contents. Because it is flush-mounted, it keeps aisles clear and eliminates accidental bangs or dangerous "catches" from passing traffic. Exclusive gripper pad provides secure hold. Two keys are included for security.

Self-latching mechanism:

All Justrite cabinets are built with a three-point, self-latching door that ensures complete closure, even without turning the handle, providing maximum safety from potential fire. A latched door is required for protection under fire conditions.

Hinge:

All Justrite cabinet doors feature a continuous piano hinge for smooth operation, a three-point closure with keyed lock and our exclusive self-latching mechanism on all door styles.

Compliance:

Designed to meet U.S. OSHA and NFPA regulations.

Bullet Latching System

Stainless steel, three-point bullet self-latching system provides easy, fail-safe, positive door closure with increased heat resistance

 **JUSTRITE®**

Safety Cabinets FOR FLAMMABLES

Industry-leading Justrite Sure-Grip® EX Safety Cabinets offer safe, dependable flammable liquid storage and protection.

Protect workers, reduce fire risks and improve productivity by storing hazardous liquids in code compliant safety cabinets. Designed to meet US OSHA and NFPA standards, Justrite's cabinets are constructed of sturdy 1 mm double-wall, welded steel with 38 mm of insulating air space for fire resistance. High performance, self-latching doors close easily and securely for maximum protection under fire conditions. Fail-safe closing mechanism ensures three-point stainless steel bullet latching system works the first time, every time.

Sure-Grip® EX offers exclusive features to make a workplace extra safe, extra secure. U-Loc™ handle comes with a double key set or accepts an optional padlock for added security. When illuminated with a flashlight, Haz-Alert™ reflective warning labels burst with high visibility under fire conditions or during power outages.

Patented SpillSlope™ galvanised steel shelves direct spills to back and bottom into leakproof sump. They adjust on 76 mm centres for versatile storage. Other extras include a leaktight 51mm bottom sump, dual vents with flame arresters, four adjustable self-levelling feet, earthing connector and trilingual warning label. Finished inside and out with a durable lead-free epoxy/polyester powder-paint for chemical resistance, each cabinet is backed by an exclusive Ten-Year Warranty. FM Approved.

Self-closing models also meet the Uniform Fire Code. They shut and latch automatically when a fusible link melts at 74°C under fire conditions. Unique, concealed self-closing mechanism offers "obstruction-free" access to contents.

Reduce harmful VOC vapours inside safety cabinets.

VaporTrap™ Filter reduces harmful VOC vapours found inside safety cabinets. Activated carbon filter medium contained in a stainless steel mesh cartridge adsorbs the volatile organic chemical vapours found inside cabinets containing flammable liquids. Improves your work environment by reducing employee's inhalation exposure to VOC's and lowers emissions of VOC's into the atmosphere. Sturdy 102 mm x 139 mm magnetised base offers flexible placement anywhere within the cabinet. Date notation area on label serves as a reminder for replacement; life cycle varies based upon vapour types and concentrations.

Note: Due to variables such as the chemical itself, its purity or its vapour pressure, temperature, humidity, charcoal age, etc., it is difficult to estimate VOC vapour adsorption rates. The Justrite VaporTrap™ Carbon Filter is not intended to be used as a substitute for using "safe closed containers" as required by OSHA and the EPA. It is important to clean up spills and residues from the cabinet and containers.

Accessories offer organisation and convenience.

Steel Shelf Dividers help keep cabinet contents organised. They fit all Justrite cabinets with 355 mm deep shelves and come in a set of four. Simply place over shelf and slide into position as desired.

Cabinet Riser Leg Frame provides sturdy, stable support for easy relocation of empty cabinet with forklift or pallet jack. High leg frame makes it easy to clean underneath and keeps cabinet away from floor moisture. Includes leg levelers and safety warning label "Forklift Only When Empty." Frame fits Justrite cabinets with footprint of 1092 mm x 457 mm.

Cabinet Rolling Cart makes it easy to relocate a heavy safety cabinet, bringing flammable solvents and chemicals

directly to your work area. All welded 3 mm heavy-duty steel with reinforced corners for maximum durability. Large 127 mm poly caster wheels have brakes for added safety. Ergonomic 31.75 mm push handle is removable. Frame fits any cabinet footprint of 1092 mm x 457 mm with a maximum height of 1118 mm.

Seismic Bracket Kit provides increased stability and is ideal for earthquake or hurricane prone areas. One kit allows for any safety cabinet to be secured to a wall or floor. Because there is no cabinet drilling required, the fire protection properties of the cabinet remain intact and it maintains FM approval.

Safety Cabinets

FOR FLAMMABLES

Wall Mount Safety Cabinets make the most of usable storage space.

Wall Mount Cabinets are ideal for storing small containers near work areas without taking up extra floor space. Eye-level positioning allows for easy access to solvents. Only 305 mm deep, the 76 litre model features five adjustable shelves to accommodate multiple containers. Both sizes come complete with mounting fixings and are available with Sure-Grip® handle styles.

Yellow Wall Mount Cabinets –

10-Year Warranty

Different size cabinets for storing flammables are available when lesser or larger storage capacity is needed or when there is less open storage space.

Conveniently locate liquids near work areas.

Undercounter Cabinets provide quick access at workstations by taking advantage of undercounter space for the safe storage of flammables. Cabinet is sized and fitted with a 89 mm (H) x 64 mm (D) kickplate to mount flush with other cabinetry. Dual vents with flash arresters are located on the back wall for easy connection if ventilation is needed. Self-levelling feet adjust to 29 mm for alignment on uneven floors.

Safety Cabinets

FOR FLAMMABLES

Store smaller quantities nearby.

When storing lesser quantities of flammable liquids at a work station or adding to existing storage capacities, These small cabinets make it possible to store flammables safely even when available space is at a minimum.

Countertop Safety Cabinets allow increased access to frequently used liquids, without compromising safety. Portable size keeps work areas flexible. An optional wall hanger assembly is available if wall mounting is desired.

Compac Safety Cabinets fit almost anywhere and provide protection even where space is at a premium. Only 591 mm wide, they hold a full 45 or 57 litres of flammables.

Mini Cabinet offers the smallest footprint for easy mobility on service vehicles, carts, and maintenance trikes. Includes 3 bungee cords to keep contents in place during movement.

Expand storage and safely segregate liquids.

Justrite Piggyback Cabinets provide additional safe storage for flammables without taking up valuable floor space. Designed to mount on top of Justrite's standard 114 and 170 litre manual or self-closing cabinets, they can also be used singly as a benchtop cabinet or stacked to provide additional storage. Piggyback Cabinets also lend themselves to wall mounting with the purchase of a Wall Hanger Assembly.

Safety Cabinets

FOR FLAMMABLES

Leading the
Advancement of Safety

Unlike others, where the exposed self-closing mechanism creates dangerous pinch points and reduces usable storage space, Justrite's market leading cabinets feature a hidden system in the airspace of the cabinet top, making the most of available storage space – you get the full rated capacity!

Justrite's Slimline Cabinet turns tight quarters into storage space!

Use alone or alongside larger cabinets for expanded storage with a minimum of floor space.

Justrite's Slimline Cabinets turn tight quarters into storage space! Even with a small footprint, this cabinet offers a big advantage when workspace is at a premium.

Both cabinets measure only 591 mm wide. The standard Slimline Cabinet is 457 mm deep and fits flush alongside a 170 litre cabinet. The Deep Slimline Cabinet is 864 mm deep and fits alongside a 227 or 341 litre cabinet.

Safety features are the same as larger safety cabinets and include: a three-point, self-latching door with self-latching handle, a 51 mm leakproof sump, dual vents, an earthing wire connector and large trilingual warning label identifying contents. Cabinet includes three SpillSlope™ galvanised steel shelves which direct spills to back and bottom into leakproof sump.

Safe storage for solvent filled drums.

Vertical Drum Storage Cabinets safely house one or two 110 to 200 litre drums. All cabinets are supplied with a removable, adjustable, half-depth shelf to store Class III materials or spare accessories such as drum funnels, vents and antistatic wires. Cabinets are also designed to accommodate a drum equipped with a pump or funnel so the cabinet may be used as a pumping station or for waste accumulation. Cabinets are offered with and without roller assemblies which facilitate the movement of heavy drums.

8962001
(shown with optional 25920 rollers)

See accessories below for optional drum ramp or rollers. Ramp cannot be used with drum cradle #08800

Safety Cabinets FOR COMBUSTIBLES

EASY CLOSE, SELF-LATCHING DOORS are standard on all styles of Justrite steel cabinets. A simple push closes door securely to activate the three-point latch.

Safe storage for paints and inks.

Combustibles Cabinets separate and identify Class III combustibles. Multiple adjustable shelves accommodate many smaller paint tins, aerosols and inks found in printing, painting, furniture and motor vehicle operations. Cabinets feature sturdy double-wall, 1 mm steel construction with 38 mm of air space and dual flame arresting vents. Also available in 76, 227 and 363 litre sizes – ask your distributor for details. Backed by an industry exclusive Ten-Year Warranty, US OSHA and NFPA compliant, FM Approved.

Combined drum and container storage in one partitioned OSHA compliant cabinet!

Double-Duty Partitioned Drum Cabinets are designed to fit one vertical 200 litre or 110 litre drum with a separate compartment that holds up to twelve 19 litre safety cans. Both compartments have an independently self-latching, three-point locking door for maximum protection under fire conditions. Latching system engages automatically when the door is pushed closed.

Self-close model is equipped with a fusible link which holds doors wide open during use and melts at 74°C to automatically close doors in the event of a fire. Includes drum rollers in the sump, two full size shelves in can compartment and one half-depth accessory shelf in drum section. Sturdy 1 mm double wall steel construction.

Yellow Double-Duty Partitioned Drum Cabinets – 10-Year Warranty

2 door, self-close with rollers	435*/115	1651 x 1499 x 864 mm	N,O,U	899270	—	315.0

* US OSHA Code 29CFR 1910.106 states that not more than 227 litres may be Class I and II liquids.

One-piece Polyethylene Cabinets offer maximum protection against harsh acids and corrosives.

For highly corrosive acids, Justrite's polyethylene cabinets offer the most resistance to chemical corrosion and leaks. Both models are clearly labelled for ACID contents and accept a padlock (not included) for added security.

Countertop Polyethylene Cabinet stores up to two 4 litre bottles. Door can be hinged from either side for best work-top space utilisation. Polyethylene spill tray inside contains leaks and can be removed for easy cleaning. A separate polyethylene tray stores under the cabinet and can be used as a handy work tray.

Undercounter Polyethylene Cabinet safely stores thirty 1 litre bottles or a variety of containers. Each segregated compartment has an adjustable shelf and storage in both doors for small containers. Two removable sumps slide out for easy cleaning of incidental spills. Two vent holes (with removable caps) at rear accommodate pressurised vapour removal systems. Unit includes fixings to secure cabinet to wall.

24015

Sturdy, smooth construction in an attractive design

Solid Polyethylene Acid Cabinets have excellent chemical resistance to handle the most corrosive chemicals and make clean up a snap. They feature a protective, all-welded bottom sump and a clean, sleek design to complement laboratory settings. Fully welded, liquid-tight 51 mm sump contains accidental spills. Shelves on larger units adjust on 76 mm center. Door hasp accepts padlock for security.

Safety Cabinets

FOR CORROSIVES

Countertop Model No. 24120 is ideal for smaller quantities used at workbench level. Undercounter Model No. 24140 can also be used as free standing and includes a removable, easy-to-clean polyethylene work surface top which is recessed 16 mm to help contain incidental leaks.

Durable and highly chemical-resistant!

Justrite Wood Laminate Storage Cabinets are suitable for highly corrosive liquids such as phenol, nitric acid and sulfuric acid. Long lasting wood construction provides exceptional strength along with stainless steel handles and hinges to resist corrosion from harsh acids. Shelves adjust on 32 mm centers to accommodate a wide variety of containers. Cabinets include adjustable leg levelers, patent pending Haz-Alert™ reflective labels, and double key set for safety and security.

8922021

8922221

A wide variety of safe, compliant storage options for corrosives make steel cabinets a popular choice.

Justrite Steel Cabinets come in standard 114, 170 and 227 litre sizes as well as Slimline, Compac, Countertop, Undercounter and Piggyback styles. All models have the same quality features as Justrite's flammable cabinet, including double-wall construction, dual vents, earthing wire connections, adjustable shelves, leakproof sills, three point self-latching doors and levelling feet. To resist aggressive chemicals, acid cabinets also include polyethylene trays attached to galvanised steel shelves and a separate polyethylene liner for the bottom sump. The liner can be removed for easy cleaning of drips and leaks. The popular 114 litre two-door cabinet also includes an extra polyethylene top work tray which can be secured to cabinet top for a handy work surface. An all epoxy baked-on powder-coat finish, inside and out, provides increased chemical resistance. Paint is exclusively formulated to resist the acids, bases and solvents often used in laboratories.

Safety Cabinets FOR CORROSIVES

8923021

Specially-sized Safety Cabinets make the most of your workspace.

Undercounter Cabinets for Corrosives allow you to work intelligently and make your laboratory an efficient workspace by taking advantage of unused space and consolidating laboratory tools and equipment into one convenient area.

Worktop and Compac Cabinets offer a unique opportunity to customise work areas and make the most of available space. Whether adding to existing storage space or making solvents readily available at workstation locations, these smaller-sized cabinets are the solution when space is at a premium. Cabinets have the same features as our larger cabinets.

Specially-sized Acid Safety Cabinets incorporate the same quality features as Justrite's flammable cabinets but also include galvanised steel shelves with attached polyethylene trays and a separate polyethylene bottom sump liner that can be removed easily for cleaning drips and leaks. Specially-finished for laboratories, both inside and out, with a baked-on epoxy powder-coat paint that resists acids, bases and solvents for added chemical resistance.

Reliable protection for important papers

Justrite Document Storage Boxes keep important manuals and papers secure and readily available to users while protecting them from moisture and dirt. Weather resistant polyethylene case is durable and rustproof. Each has a smooth area to add your own labels for easy identification of contents or use the label pack provided that includes 2 blank labels and labels printed "MSDS" and "Instruction Manual." Bright red color is highly visible.

All sizes come with heavy-duty double sided tape for easy installation. Four built-in mounting holes on medium and large sized units provide added mounting options. Affix to machinery, cabinets, equipment, walls or anywhere you need protected document storage. Large size accepts MSDS binder for organized, easy access – indoors or out. Both medium and large sized units accept padlock when security is a concern. Lockable units can be used for secure transport of sensitive documents such as medical records.

Medium sized units are either top opening (flip top) or front opening with easy snap latches.

Ideal for Storage of:

- MSDS Sheets
- Instruction Books
- Receiving Bills
- Evacuation Plans
- Schedules
- Plant Layouts
- Inventory Checklists
- Operator Manuals
- Emergency Contacts
- Certificates
- Medical Records

General Storage FOR EMERGENCY SUPPLIES

Be ready when disaster strikes

Justrite Emergency Preparedness Cabinets are for protected, quick access to emergency supplies during a disaster. This high performance cabinet features a fire resistant design with durable powder paint “emergency orange” finish for high visibility. Glo Alert™ glow-in-the-dark labels ensure fast location during power outages. Spacious design includes four adjustable shelves and provides dependable storage for flashlights, radios, respirators, first aid items, and much more.

High quality 3-pt stainless steel bullet latching system and smooth opening/closing piano hinge doors work first time, every time. Long-lasting design is backed by a 10-year limited warranty. Additional features include U-Loc™ handle with 2 keys and 4 adjustable feet.

Ideal for public use facilities

Hospitals	Office Buildings	Factories
Airports	Banks	Stadiums
Schools	Shopping Malls	Hotels/Resorts

GloAlert™ labels glow in the dark for easy location of supplies in an emergency.

U-Loc™ handle includes double key set and accepts optional padlock.

Emergency Supplies:

Radios	Fire Blanket
Walkie Talkies	First Aid Supplies
Flashlights/batteries	Duct Tape/Tarps/Rope
Megaphone	Rescue Tools
Shock Blanket	Emergency Food/Water

Oily Waste Cans
Plunger Cans
Bench Cans

All other Justrite products are covered by a Limited Warranty for a period of **one year** from date of purchase.

The Warranty is limited to the replacement of Products. Warranty does not apply to any products which have been subject to any misuse, including but not limited to products used with materials (primarily liquids) that are not recommended by the manufacturer in instructions furnished with the product or in published product descriptions; products which have been altered in any way by the user or used in a manner inconsistent with their intended use; products which have been subjected to severe treatment (undue pressure against movable parts, exposure to severe weather, dropping, etc.) not reasonably associated with "ordinary" usage. THERE ARE NO OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL JUSTRITE BE LIABLE FOR ANY LOSS OF PROFITS OR ANY INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF ANY SUCH DEFECT IN MATERIAL OR WORKMANSHIP.

Justrite and Chemical Compatibility

Because of the complex nature of chemicals, Justrite cannot offer specific recommendations on chemical compatibility. Your chemical supplier, MSDS sheets, or other expert sources should be consulted. To aid in your decision process to select the appropriate Justrite product for your application, contact Justrite Customer Service to obtain sample material parts for you to test with the chemicals you are using. Justrite makes no guarantee of results and assumes no obligation or liability in connection with the use of these products and their application relative to their chemical compatibility. It is the end user's sole responsibility to determine the nature of the materials to be contained and to select the proper product suitable for a particular application. Furthermore, it is the end user's responsibility to insure that the product selected is suitable for its intended use. **JUSTRITE MAKES NO WARRANTY, EXPRESSED OR IMPLIED OF MERCHANTABILITY OR FITNESS FOR PURPOSE**, and assumes no liability in connection with any product made or sold by Justrite with regard to its use or chemical compatibility.

To help guide the selection process, see page 42 for a Compatibility Chart of commonly used liquids.

Justrite Printed Catalog

Warranty Disclaimer: Justrite has made a diligent effort to illustrate and describe the products in this catalog accurately; however, such illustrations and descriptions are for the sole purpose of identification, and do not express or imply a warranty that the products are MERCHANTABILITY, or FIT FOR A PARTICULAR PURPOSE, or that the products will necessarily conform to the illustrations or descriptions. Always check for product specifications prior to purchase. No warranty or affirmation of fact, express or implied, other than as set forth in the limited warranty statement above is made or authorised by Justrite. Justrite reserves the right to correct publishing errors.

Note: Justrite metric equivalents may be inconsistently noted. Capacities shown may be nominal because some products may hold more than listed to accommodate manufacturing tolerances and expansion, as well as others are designed to accommodate additives which is a common practice with safety can usage. Additionally, "rounding" may occur to simplify data or where catalog space is restrictive. In other cases nominal capacities have simply become accepted "industry practice" over the last 100 years since Justrite has been in business.
