

## smart solutions, smart savings

### arvento basic set

Easy-to-use solution that meets the requirements of essential vehicle tracking needs.

- imt.11 Vehicle Tracking Device
- Vehicle Tracking and Fleet Management Software
- Licensed Digital Maps
- 1 Year Warranty (Extended throughout subscription period)

### arvento pro set

A comprehensive vehicle tracking and fleet management solution for the industry-specific requirements.

- imt.14 Vehicle Tracking Device
- Vehicle Tracking and Fleet Management Software
- Licensed Digital Maps
- 1 Year Warranty (Extended throughout subscription period)

### arvento obd tracking set

Easily to install OBD Plug & Play Tracking Solution for tracking of all data of the vehicle.

- imt.27 OBD-II Tracking Device
- Vehicle Tracking and Fleet Management Software
- Licensed Digital Maps
- 1 Year Warranty (Extended throughout subscription period)

### arvento container tracking set

A solution giving long distance transportation businesses the peace of mind with specially designed device to providing protection against water, dust and other potential hazards.

- imt.54 Container Tracking Device
- Vehicle Tracking and Fleet Management Software
- Licensed Digital Maps
- 1 Year Warranty (Extended throughout subscription period)

### arvento treyki auto

New generation OBD-II tracker solution, which offers brand new features to stay connected to your vehicle.

- Arvento Treyki Auto OBD-II Tracking Device
- Arvento Treyki Auto Software
- Licensed Digital Maps
- 1 Year Warranty

### arvento treyki mini

Easy-to-use asset/people tracker, which provides safety and monitoring solutions for your loved ones and valuable assets.

- Arvento Treyki Mini Tracking Device
- Arvento Treyki Mini Software
- Licensed Digital Maps
- 1 Year Warranty

SOLUTIONS

## top choice for world's top brands

### why arvento?

#### → strong references

Arvento is a worldwide leading technology company specialized in developing and manufacturing both hardware and software fleet telematics and asset tracking systems.

Today, Arvento has more than 76.000 customers and 832.000 mobile devices in 3 continents and is one of the major players in Turkey, GCC and CIS regions.

#### → experience

Arvento's highly-skilled research and development team consistently work on innovating and developing new solutions.

#### → product diversity

Arvento offers a wide range of innovation-driven products and solutions to meet different customer needs.

#### → technology and quality

Arvento with its advanced technology and high quality products, have obtained international certifications. Arvento holds ISO 9001-2008, ISO 14001, ISO 27001 quality certificates as well.

#### → sales and service network

Arvento's highly experienced and certified service and dealer network delivers world-class customer satisfaction.

#### → warranty

Arvento products come with one (1) year warranty, which is extended throughout the subscription period.

FEATURES OF THE DEVICE	BASIC SET	PRO SET	OBD SET	CONT.SET
1. Vehicle tracking devices included in the package	imt.11	imt.14	imt.27 treky auto	imt.54
2. A single unit integrated with GSM and GPS antennae	☑	☑	☑	☑
3. 50-channel GPS Receiver and Assist GPS that is compliant with GALILEO and ensures that reliable location information is received	☑	☑	☑	☑
4. Integrated Motion Sensor (G-Sensor) detecting motion, potential accident or the towing of the vehicle	☑	☑	☑	☑
5. A back-up battery which becomes active in case of a possible electricity outage in the vehicle		7Hour*	Removal detection	300Hour*
6. Water, dust and impact-resistant design complying with the standards of IP67 class and the feature of magnetic assembly				☑
7. Firmware-over-the-air (FOTA - distant firmware update utility) and programming over GPRS	☑	☑	☑	☑
8. Internal memory for the storage of data against the problems of GSM/GPRS coverage	☑	☑	☑	☑
9. A sensor for the detection of the opening/closing of the cover of the device (Tamper Detection)		☑		
10. Detection of electricity outage		☑	☑	
11. Detection of the removal of the device			☑	☑
12. International CE, e-Mark and RoHS certificates showing that the use of devices within vehicles poses no problem	e-Mark	e-Mark	e-Mark	CE**
13. Measurement of distance over GPS	☑		☑	☑
14. Measurement of distance over kilometer indicator	☑	☑		
15. Measurement of distance over engine control unit		☑	☑	
16. Detection of the start/stop of the engine	☑	☑	☑	
17. Two-way communication between the center and the vehicle through the Connected Navigation Unit	○	○	○	
18. Emergency Pedal and Button allowing the driver to send alarm messages to the center in case of emergency	○	○		
19. Stopping the vehicle or blocking a stable vehicle from a remote location	○	○		
20. Buzzer within the vehicle if the driver exceeds the speed limit	○	○	○	
21. Sending an alarm in case of the opening of the cover of the fuel tank (Fuel Tank Cover Sensor)	○	○		
22. Measurement of temperature: Sending an alarm in case of a decrease under or an increase over the predefined values (Temperature Sensor)		○		
23. Remote interception inside the vehicle (Interception Unit)		○		
24. Two-way voice call between the vehicle and the center over GSM network (Voice Call Kit)		○		
25. Tracking which vehicle is driven by which driver and its duration (Driver Identification Unit)		○		
26. Digital Tachograph Integration		CAN-Bus TMC UDS*	OBDII	
27. Tracking fuel levels and fuel consumption of vehicles (Fuel Level Indication Sensor)		○		
28. In the absence of GSM coverage, automatic data transfer over satellite (Satellite Communication Kit)		○		
29. Alarm for towing	☑	☑	☑	☑

WARRANTY	BASIC SET	PRO SET	OBD SET	CONT.SET
1. Device and software warranty for 2 years	☑	☑	☑	☑
2. Server and subscription service for 2 years	☑	☑	☑	☑
3. Unlimited warranty that goes on during subscription	☑	☑	☑	☑

\* The battery life varies depending on the frequency of sending the data requested from the device.  
\*\* e-Mark not needed because of magnetic installation system.  
\*\*\* Can only be used with appropriate peripheral units.

FEATURES OF THE WEB-BASED VEHICLE TRACKING SOFTWARE	BASIC SET	PRO SET	OBD SET	CONT.SET
1. Real-time tracking of the location and address information of vehicles over numerical maps	☑	☑	☑	☑
2. Retrospective mobile tracking of vehicles on the map and current and retrospective reporting thereof in the form of a list in "pdf/excel/html" format	☑	☑	☑	☑
3. Tracking the real speeds of vehicles and sending an alarm if the speed limit is exceeded, definition of different speed limits for urban and inter-city roads	☑	☑	☑	☑
4. Defining zone(s) on the map and tracking and reporting the entry-exit of vehicles to these zones	☑	☑	☑	☑
5. Tracking the stopover period and location of vehicles, sending an alarm when the predefined stopover period is exceeded	☑	☑	☑	☑
6. Tracking the operation periods, ignition on/off locations and periods of vehicles	☑	☑	☑	
7. Tracking the idle periods and sending an alarm when the predefined periods are exceeded	☑	☑	☑	
8. Drawing a route on the map and sending an alarm if the vehicle goes out of this route	☑	☑	☑	☑
9. Grouping vehicles and tracking them on the screen depending on these groups	☑	☑	☑	☑
10. Designating the vehicles that are stable, moving, in violation and from which no information can be received on the map in different colors and groups	☑	☑	☑	☑
11. Using the software at various authorization levels (Available authorization levels - 8)	☑	☑	☑	☑
12. Using customizable icons for vehicles and devices	☑	☑	☑	☑
13. Tracking vehicles by license plate, driver, team or device number	☑	☑	☑	☑
14. Sending an alarm to the predefined e-mail addresses	☑	☑	☑	☑
15. Sending periodical reports to the predefined e-mail addresses	☑	☑	☑	☑
16. Creating the fastest or shortest route between the points defined on the map	☑	☑	☑	☑
17. Customization of the software by the user by adding buildings or zones to the map	☑	☑	☑	☑
18. Tracking devices on the map as well as in the form of a list	☑	☑	☑	☑
19. Tracking vehicles or vehicle groups on the screen through different windows	☑	☑	☑	☑
20. Language options in Turkish, English, German, Arabic, Russian, Azerbaijani, Persian, Macedonian, French, Ukrainian, Kazakh, Albanian, Georgian	☑	☑	☑	☑
21. Alarms and reports for speed, motion, stopover, idle, entry to/exit from the predefined zones, sudden acceleration/slowdown and route violation	☑	☑	☑	☑
22. Alarms and reports for the start/stop of the engine, emergency button and the opening/closing of doors ****	☑	☑	☑	☑
23. Alarms and reports relevant for the driver, temperature and fuel consumption		☑		
24. RAG (Red-Amber-Green) reports / Economic and Safe Driving reports	☑	☑	☑	
25. Alarms and reports of the data related to the vehicle such as engine revolution, speed etc.***		☑	☑	
26. Dividing the control screen into 4 sections and performing separate operations in each of them	☑	☑	☑	☑
27. Google maps	○	○	○	○

FEATURES OF THE WEB-BASED VEHICLE TRACKING SOFTWARE	BASIC SET	PRO SET	OBD SET	CONT.SET
1. Desktop Vehicle Tracking Software	☑	☑	☑	☑
2. Fleet Management Software (Creating and tracking records such as vehicle maintenance, service etc.)	☑	☑	☑	☑
3. iPHONE/PAD (iOS) Vehicle Tracking Application	☑	☑	☑	☑
4. WINDOWS PHONE Vehicle Tracking Application	☑	☑	☑	☑
5. ANDROID Vehicle Tracking Application	☑	☑	☑	☑

## software and applications

Never lose track of your vehicles with Web/Desktop Software and mobile applications specifically designed and compatible with iPhone/iPad (iOS), Windows Phone and Android devices.

### → Arvento Web-Based Software

Arvento's easy-to-use web based interface, can be accessed with a user name and password from any internet enabled PC through www.arvento.com. The simple interface enables users to access their system with digital maps hosted on the web server.

### → Arvento Desktop Software

Arvento desktop solution and digital maps installed on the user's PC, only receives the data through the devices. Thus, it operates fast and effectively even with the low bandwidth internet connections.

### → On the Go with iPhone/iPad (iOS), Windows Phone and Android Applications

Vehicles can be monitored in real time on the digital maps with Arvento's mobile applications specifically designed and compatible with iPhone/iPad (iOS), Windows Phone and Android based devices. Users can easily access reports, notifications, warning messages and monitor vehicles through the mobile applications. Furthermore, it is possible to track GPS-capable mobile devices through the internet similar to tracking units installed on vehicles.

## references

Today, Arvento has more than 76.000 clients and its technology and products are being used by 832.000 vehicles in 3 continents.
