

# DYNASPHERE AIR TERMINAL, MKIV

The economic and safety implications of lightning can be devastating. In general, the highest point of a facility is the most vulnerable to a direct lightning strike. Lightning rods or air terminals are needed to capture the strike to a preferred point and to safely conduct the energy to ground to minimize the risk.

The nVent ERICO Dynasphere air terminal provides a preferred point for lightning discharges which would otherwise strike and damage an unprotected structure and/or its contents. The primary function of an air terminal, or air termination system, is to capture the lightning strike to a preferred point, so that the discharge current can be directed via the downconductor(s) to the grounding system.

## CERTIFICATIONS

## FEATURES

- Dynamic response to the approach of a lightning downleader
- Non-radioactive technology
- No external power required
- Three replaceable terminals for specific elevation requirements

## SPECIFICATIONS

Table 1/2

Catalog Number	Material	Temperature	Effective Projected Area	Diameter (Ø)	Height (H)	Thread Size (TS)
D/SMKIVSS	Stainless Steel 316 (EN 1.4401)	-40 to 212 °F	42"²	10.1"	8.66"	1/2" BSPP

Table 2/2

Catalog Number	Unit Weight
D/SMKIVSS	5.74 lb
