

Line 4 corn seeder

It is a good seeder that does so in one go, soil, digging, fertilizing, planting, covering and pressing without any damage to the seed. High precision seed removal, planting time uniformity, seed saving. Mainly used for planting corn, you can also sow beans, cotton seeds, peanuts and sunflower seeds. It is versatile. The machine can spread the foundation during sowing and can be suppressed at the same time. Feed port driven by gear. Inside the drive gear there is an anti-reverse mechanism to avoid machine malfunction caused by turning over. Pitch can be adjusted by adjusting the different driven gear.

Type	2BMF-4
Seeding depth (cm)	2-8
Rows	4
Fertilizer depth (Cm)	2-8
Line spacing	70-80
weight(Kg)	310
