

Just one push

And there's
no need to
re-tighten

Just push it

Push-in Spring motor
starting solution.

Faster than ever wiring, easier than ever installation, and still the same reliable as ever connections. The all-new Push-in Spring motor starting solution is designed to provide connections that are stronger than ever, which have been shock and vibration tested. And with self-tightening terminals, the high connection strength is guaranteed throughout the whole lifetime of the device, giving you complete peace of mind. So for speed, ease and reliability, just push it. abb.com/lowvoltage
